SOURCES: Applicant Studies, AFMC (applicant data))
 Statistics Canada (demographic data)

Refugees are included with Permanent Residents

The methodology for conducting the applicant study changed in 1971. In earlier years some uncompetitive prospective applicants may not have been counted because the initial goal of the applicant study was to find out how many qualified applicants were not gaining admission. Also up to 1970, some students did not compete for admission but entered medicine directly from pre-medical programs. The figures were adjusted upwards to include 1 applicant for each person admitted directly. However, it is probable that more than 1 applicant would have competed for each available place had the places been filled through open competition.

See notes at end of document: 2007/08 and 2008/09 data exclude applicant data from Queen's University

¹ The University of Saskatchewan did not accept any applications for admission in 1987/88 due to introduction of new curriculum in 1988/89.

Data as reported to AFMC. For some faculties of medicine, there may be discontinuities in the series. Such a discontinuity may occur, for example, if a faculty of medicine adopts new policies with respect to foreign applicants. A faculty may refuse to accept applications from outside Canada whereas they were accepted in the past **or** accept such applications whereas they were not accepted in the past.

See notes at end of document: 2007/08 and 2008/09 data exclude applicant data from Queen's University

¹ Includes applicants with refugee status

² Beginning in 1996/97 several Canadian faculties of medicine admitted foreign applicants to above-quota, contract positions for the study of medicine. Some of these are admitted into year 1 of the MD program, others are admitted with advanced standing.

.. Data not available or unreliable

NOTE: These figures do not take into account the numbers who were offered a place and declined it. For example, in 2008/09, a further 2.4% of Canadian citizens were offered a place but did not register and 0.3% of Canadian citizens had their admission deferred to a later year.

¹ Includes registrants with refugee status

Rates reported were calculated excluding applicants who were offered a place but did not subsequently register in a Canadian faculty of medicine and those whose admission was deferred to a subsequent year.

See notes at end of document: 2007/08 and 2008/09 data exclude applicant data from Queen's University

Notes about Applicant Study Tables

Provision of MD program applicant data is delayed for Ontario. In order to provide the most current results, available 2008 data were used to prepare MD program applicant statistics for the 2010 Canadian Medical Education Statistics (CMES) report. At the time of publication, 2008 MD program applicant data is available for all faculties of medicine, with the exception of Queen's University. AFMC will prepare and publish updated medical school application results when data supply from Ontario resumes. Trend data for the years 2007/08 and 2008/09 exclude only applicant data from Queen's University.

The following aggregate level statistics provide under-coverage estimates for 2008 CMES MD program application results:

1. In 2008, 1 852 applications were submitted to the MD program at Queen's University*.
2. In 2006, a total of 3 (of 2 200) distinct applicants applied only to the Queen's University MD program.**

*Source: The Ontario Universities' Application Centre, Medical School Application Statistics. Accessed at http://www.ouac.on.ca/statistics/med_app_stats/, September 14, 2010.

Notes concernant les tableaux 73 à 123

La prestation des données relatives aux candidats au programme d'études médicales prédoctorales est retardée pour l'Ontario. Afin de fournir les résultats les plus à jour, les données de 2008 qui étaient déjà disponibles ont été utilisées pour préparer les statistiques sur les candidats au programme d'études médicales prédoctorales pour l'édition 2010 du rapport sur les Statistiques relatives à l'enseignement médical au Canada (SREMC). Au moment de la publication, les données de 2008 relatives aux candidats au programme d'études médicales prédoctorales étaient disponibles pour toutes les facultés de médecine, à l'exception de *Queen's University*. L'AFMC préparera et publiera les résultats mis à jour relativement aux demandes d'inscription dans les facultés de médecine lorsque l'Ontario recommencera à fournir des données. Les tendances relatives aux données pour les années 2007/08 et 2008/09 excluent seulement les données relatives aux candidats pour *Queen's University*.

Les statistiques agrégées suivantes donnent des estimations du sous-dénombrement des résultats relatifs aux demandes d'inscription au programme de médecine pour l'édition 2007-08 des SREMC :

- En 2008, 1 852 demandes d'inscription ont été présentées pour le programme de médecine de *Queen's University**
- En 2006, un total de 3 candidats distincts ont présenté une demande d'inscription au programme de médecine seulement à *Queen's University***
