

**NOTES TO ENROLMENT TABLES**  
**Notes explicatives concernant les inscriptions**

During the 1980/81 year, the Office of Research and Information Services of AFMC conducted a review of the medical faculty enrolment series accumulated over a number of years. A thorough review of the original questionnaires and other documentation in AFMC files led to a consistent series of data being compiled. Problems arose with respect to the classification of:

- a) pre-medical students,
- b) pre-MD interns (particularly at Dalhousie University),
- c) students enrolled in the first year of five year programs as they were phased in and out of several medical faculties over the years.

**First time** enrolment excludes students repeating a year of study and students returning from a leave of absence; **First year** and **total** enrolment include these students.

These issues were dealt with as follows:

- a) **Pre-medical students:**  
For all years and medical faculties in which such programs operated, they were systematically excluded from the enrolment series.
- b) **Pre-MD interns:**  
For all medical faculties and years in which the MD was granted only upon completion of an internship year, the students in the internship year were excluded from the enrolment series.
- c) **Five year programs:**  
In all years and medical faculties in which five year MD programs were operating, students in *all* five years of study were included in the enrolment series.

In addition to the general notes, the following specific organizational changes, etc. are reflected in the data:

- 1) Data available to AFMC allowed us to produce reliable enrolment data back to 1957/58.
- 2) From 1957/58 to 1960/61 inclusive, data were not available for individual medical faculties. For those four years national totals by sex, year of study and years to graduation were available.
- 3) From 1961/62 to the present date, in addition to the national series, data series for individual medical faculties are also available.
- 4) **1966/67**  
*Université de Sherbrooke* admitted its first medical class.
- 5) **1968/69**  
*Université Laval* changed from a four year MD program to a five year program. Laval admitted a complete class into both the four and five year programs. *University of Saskatchewan* also introduced its five year program. It admitted half its usual complement of students into the four year and half into the new five year program.

- 6) **1969/70**  
*Université de Montréal* introduced a five year program. It admitted two first year classes, one into the four year and one into the five year program. *Université Laval* and the *University of Saskatchewan* admitted only to the five year programs; they both had two second year classes, one second year class three years from graduation and one second year class four years from graduation. *McMaster and Memorial University* each admitted its first class of medical students.
- 7) **1970/71**  
*Université Laval* changed back to a four year medical program for all its medical students. The newly admitted students to the four year program as well as those entering the second year of the five year program (admitted the previous year) were four years from graduation. Also, the third year class consisted of an amalgamation of those three years from graduation in the five year program and two years from graduation in the four year program. *University of Calgary* admitted its first class of medical students.
- 8) **1987/88 & 1988/89**  
In 1987/88 the *University of Saskatchewan* changed from a five year program to a four year program and did not admit any students into first year. In 1988/89 students were admitted into the first year of a new four year program.
- 9) **1992/93**  
In 1992/93 the *Université de Montréal* changed from a five year program to a four year program and did not admit any students into first year. It did however, admit students into a preparatory year: "année préparatoire".
- 10) **Starting in 1996**, a new category of foreign student commenced the MD program in Canada. These are students admitted under agreements with foreign governments or foreign educational institutions. These students pay close to full cost for their medical education.
- 11) **1997/98**  
In 1997/98, the *University of Western Ontario* failed to report complete data. For this reason, all numbers relating to UWO and any subtotals and totals are estimated.
- 12) **2005/06**  
*Northern Ontario School of Medicine* admitted its first class of medical students into year 1.
- 13) **2007/08**  
Ontario applicant data is unavailable, so tables relating to enrolment by province of residence are incomplete for 2007/08.

**Enrolment in Canadian Faculties of Medicine by Sex, 1968/69 - 2009/10**  
**Inscriptions aux facultés de médecine canadiennes selon le sexe**

<sup>1</sup> The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested a prolonged period of study.

<sup>2</sup> Of the students admitted with advanced standing each year, the following were transfers from one Canadian faculty of medicine to another: 1 in 2009/10, 2008/09 and 2007/08; 0 in 2006/07; 3 in 2005/06; 1 in 2004/05; 6 in 2003/04; 2 in 2002/03; 2 in 2001/02; 2 in 2000/01; 6 in 1999/2000; 1 in 1998/99; 3 in 1997/98; 2 in 1996/97; 2 in 1995/96; 4 in 1994/95; 3 in 1993/94; 5 in 1992/93; 10 in 1991/92; 13 in 1990/91.

See notes on page 10.

2009/10

\* For U. de Montréal, the figures given include: students promoted to first year from année préparatoire, and students admitted directly in year 1.

201  
60

Series for *first time, advanced standing* was revised December 1996, thus numbers differ slightly from tables published before that year.

Excludes repeaters, returnees from leaves of absence and students who transferred from one Canadian faculty of medicine to another.

See notes on page 10.

<sup>1</sup> Students at Université Laval have the option to spread their MD program over five years instead of four years. The numbers who are five years from graduation include those students already enrolled in year 1 who have opted to prolong their program; those reported as being four years from graduation include those in year 1 who intend to complete the program in 4 years and those in year 2 who intend to take an additional year; those reported as being three years from graduation include those in year 2 who intend to complete the program in 4 years and those in year 3 who intend to take an additional year. The majority of students each year choose to extend their program of study over five years.

<sup>2</sup> Students listed as five years to graduation are enrolled in *année préparatoire* of the four year program at Université de Montréal.

NOTE: These data include 44 students (6 three years from graduation, 12 two years from graduation, 26 in the final year) enrolled in above-quota positions under contract between the faculty of medicine and a foreign government or institution.

<sup>1</sup> The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested that they prolong their period of study.

<sup>2</sup> Of the 20 advanced standing admissions in 2009/10, 10 were admitted to above-quota positions under contract with foreign governments or institutions. Transfers from one Canadian faculty of medicine to another are counted as continuing students.

<sup>3</sup> Figures for U. de Montréal in 2009/10 include 208 students admitted for the first time into *année préparatoire*; 60 students admitted directly into year 1. Students promoted from *année préparatoire* enrolled in year 1 for the first time (201) are included under "continuing students".

<sup>1</sup> Numbers for Université de Montréal include 60 students admitted directly into year 1 in 2009/10 and 201 students promoted from *année préparatoire* in 2009/10.

<sup>2</sup> Students admitted with advanced standing who were **transfers from another Canadian medical faculty** were not first time admissions to the system as a whole, although the students were enrolled for the first time at the faculty of medicine in which they were registered in 2009/10. There was only 1 student who transferred from one Canadian medical faculty to another this year who is **not included** in the total first time admissions.

<sup>3</sup> Of the 20 advanced standing admissions (excluding transfers), 10 were foreign students studying on a student visa, 4 were Canadian citizens, and 6 were permanent residents of Canada.

Total first time enrolment:   2 657 Canadian citizens  
(year 1 to year 4 only)       57 Permanent residents  
  20 Visa students  
  2 734

Note: These data include 10 foreign students (0 in year 1 and 10 admitted with advanced standing) who were admitted for the first time in above-quota positions under contract between the medical faculty and a foreign government or institution.

## ATTRITION RATES

### TAUX D'ABANDON

Attrition rates were calculated as follows:

- 1) All students enrolled during the 2008/09 academic year and who had **definitely** dropped out by September 2009 are included, irrespective of reason for drop-out.
- 2) Students who were on leaves of absence during the 2008/09 academic year and who were expected to return to medical studies during the 2008/09 academic year are included if they **did not enrol** in 2008/09 and the Faculty of Medicine confirmed that they would not be returning at a later date. Students whose leaves of absence were extended, for whatever reason, **are not** counted as drop-outs.
- 3) Students who were expected to graduate in 2009 and who were later reported on the "List of Graduating Students, 2009" as drop-outs **are** included in these counts.

#### Attrition (by September 2009) of Students Enrolled in Canadian Faculties of Medicine in 2008/09 by Faculty of Medicine and Year of Study

#### Taux d'abandon (jusqu'en septembre 2009) des étudiants inscrits aux facultés de médecine canadiennes en 2008/09 selon la faculté de médecine et l'année d'études
