ACKNOWLEDGEMENTS

AFMC's Data and Information Services Team is pleased to present Volume 43 in its annual series of statistical publications related to medical education in Canada.

The assembly of the information contained in this publication involved many people and organizations who gave generously of their time and resources.

AFMC would like to thank the deans of Canada's faculties of medicine and those members of their staffs who responded to the numerous questionnaires and requests for information.

Information on post-MD clinical training is made available through Canadian Post-M.D. Education Registry (CAPER). AFMC is grateful to CAPER and its partners for their contribution to the Canadian Medical Education Statistics report.

Canadian Medical Education Statistics 2021

Background

Canadian Medical Education Statistics (CMES) is a collection of results from several AFMC annual studies performed by AFMC's Data and Information Services team.

AFMC's Data and Information Services team manages the national repository of information on faculties of medicine across Canada. Formerly named Office of Research and Information Services (ORIS), this service was established in 1985 as a division of research and data collection at AFMC with over 40 years of data holdings focused mainly on undergraduate medical education and provides expertise in the analysis and interpretation of data through longitudinal studies and trend analysis.

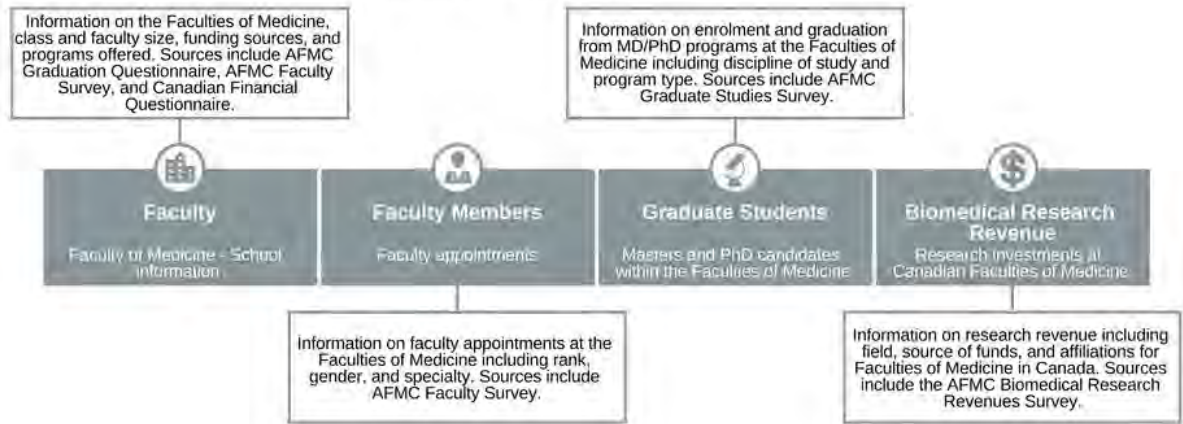

With this data, AFMC is the source of information on physician inflow and output through Canada's undergraduate and postgraduate training system, the number and types of doctors trained and how they are distributed and move throughout Canada. AFMC also gathers data pertaining to our faculties of medicine such as their faculty complements, curriculum offerings, tuition fees, and research revenues.

Data holdings, a collection of information on a subject, are populated via Surveys to schools and learners and used to create the Studies AFMC publishes in the Canadian Medical Education Statistics collection. The data available in Canadian Medical Education Statistics are used by the Canadian faculties of medicine, the federal government, provincial/territorial ministries of health, and private industries as well as AFMC's constituents.

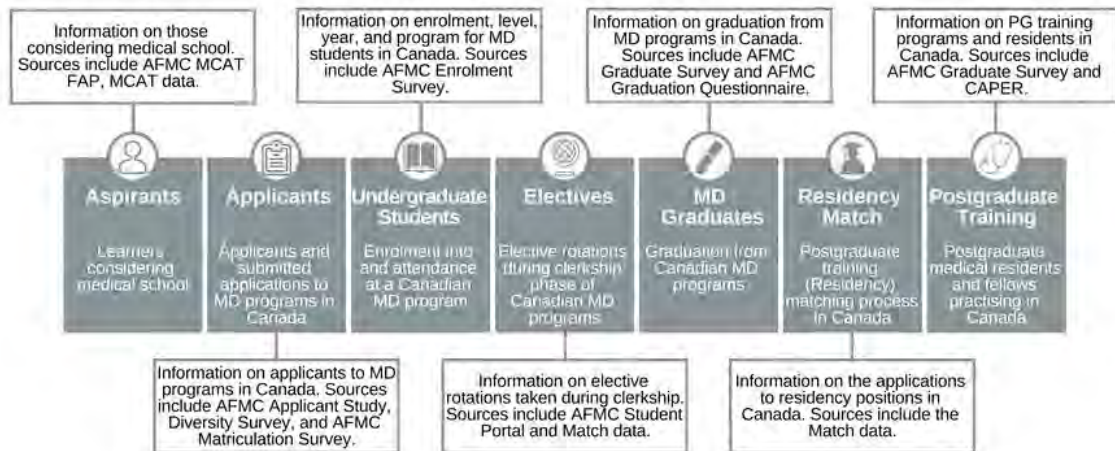

The Canadian Medical Education Statistics collection is organized into two parts, one focusing on the Faculties of Medicine themselves, and the second on the Pathway to Practice – that is, learners moving through the Medical Education system to become practicing providers. Data holdings for these two parts are summarized graphically below.

Canadian Medical Education Statistics 2021

AFMC Data Holdings - *Faculties of Medicine of Canada*

AFMC Data Holdings - *Learners Pathway to Practice*

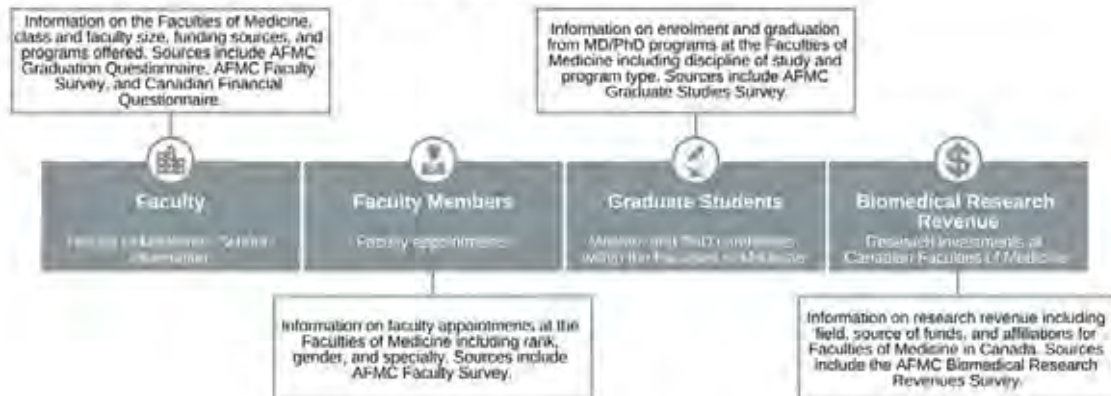

Part I - Information on Faculties

Canadian Medical Education Statistics 2021

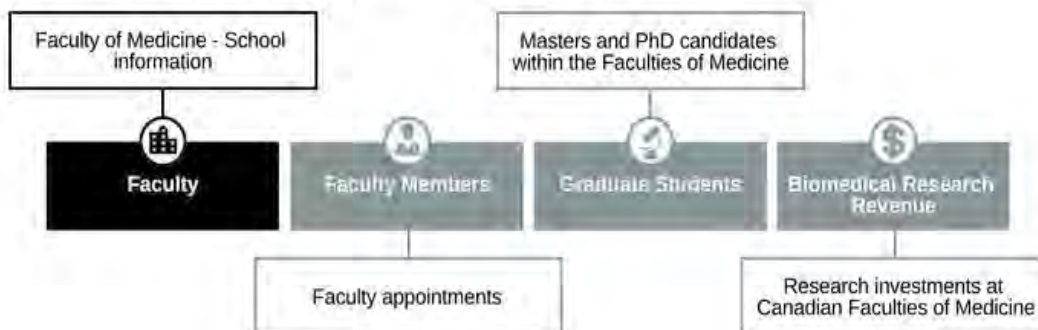

AFMC Data Holdings - *Faculties of Medicine of Canada*

Canadian Medical Education Statistics 2021

Section A. AFMC Faculties of Medicine Data – Description:

AFMC Data Holdings - *Faculties of Medicine of Canada*

Section A contains information about the seventeen Canadian Faculties of Medicine. This section provides information on quotas for first year positions, duration of clinical clerkships and stipend amounts, tuition and other fees, and post-M.D. trainee fees and remuneration, and other information about the Faculties of Medicine. The data are collected primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual two-part survey collecting statistical information about Canadian faculties of medicine on a number of topics. The AFMS data have been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section A. The AFMC Faculties of Medicine Data – Table Contents:

Table A-1	Accredited Canadian Faculties of Medicine
Table A-2i	Information about Canadian Faculties of Medicine
Table A-2ii	Quota Allocation in Canadian Faculties of Medicine
Table A-3	Tuition Fees in Canadian Faculties of Medicine: Session Commencing Fall
Table A-4	Population Aged 20 to 24 and Number of First Year Places Filled in Canadian Faculties of Medicine by Province of Residence
Table A-5	Payment Scales for Post-MD Clinical Trainees in Canadian Faculties of Medicine by Rank and Province of Training
Table A-6	Post-MD Clinical Trainee Fees in Canadian Faculties of Medicine
Table A-7	Duration of Clinical Clerkship and Amount of Stipend in Canadian Faculties of Medicine

Section A. The AFMC Faculties of Medicine Data — Table Notes:

1. Tables in Section A were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Table A-6 contains detailed footnotes on the breakdown of Post-MD Clinical Training Fees for most Canadian Faculties of Medicine.
3. Table A-7 contains information on the duration of clinical clerkship and amount of stipend given to each Canadian Faculty of Medicine. Monthly payments are not always disbursed over the full duration of clerkship, per stipend. The faculties of medicine may offer additional clerkship opportunities such as integrated clerkships which differ in clerkship lengths and educational requirements.

Table A-2i
Information About Canadian Faculties of Medicine
2021/22

Province	Faculty of Medicine	Class Size		Duration of Program	Language of Instruction	MCAT Required
		Regular Quota ¹	Above Quota ^{2,3}			
Newfoundland & Labrador	Memorial University of Newfoundland	80	Not available	4 years	English	Yes
Nova Scotia	Dalhousie University	124	Available	4 years	English	Yes
Quebec	Université Laval	224	Available	4 years	French	No
	Université de Sherbrooke	222	Available	4 years	French	No
	Université de Montréal	315	Available	4 years / 5 years	French	No
	McGill University	203	Available	4 years	English / French	Yes ⁴
Ontario	University of Ottawa	156	Available	4 years	English / French	No
	Queen's University at Kingston	100	Available	4 years	English	Yes
	University of Toronto	259	Available	4 years	English	Yes
	McMaster University	203	Not available	3 years	English	Yes
	Western University	171	Available	4 years	English	Yes
	NOSM University	64	Available	4 years	English	No
Manitoba	University of Manitoba	110	Not available	4 years	English	Yes
Saskatchewan	University of Saskatchewan ⁵	100	Not available	4 years	English	Yes ⁵
Alberta	University of Alberta	162	Available	4 years	English	Yes
	University of Calgary	134	Available	3 years	English	Yes
British Columbia	University of British Columbia	288	Not available	4 years	English	Yes

¹ Regular quota numbers include positions for foreign students, as well as specific quota positions.

² Supernumerary/above-quota positions are not available to applicants from Canada. They are provided to foreign students only, under contracts with foreign governments or educational institutions to provide medical education on a cost-recovery basis. These positions may be in either first year or at an advanced standing level.

³ See Table A-2ii for details.

⁴ Only required for international students and for Canadian citizens/permanent residents who hold undergraduate degrees from non-Canadian universities.

⁵ Not required for students who have completed the prerequisite courses within Saskatchewan.

Information available as of September, 2021

¹ Exemption from paying the foreign differential fee may be granted in some cases. These exemptions are defined by individual provincial government policies.

² Other compulsory fees may vary for visa students, for example, comprehensive health care insurance.

³ International applicants are no longer accepted to the medical program.

⁴ Residents of New Brunswick pay the same tuition fee as Québec residents as a result of an interprovincial government agreement.

Table A-4
Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine
by Province of Residence
2021/22

Province or Territory of Residence	Population Aged 20 to 24 July 1, 2021	First Time, First-Year Enrolment in 2021/22 ¹	Population Aged 20 to 24 per Place	Relative Opportunity ²	Rank
Newfoundland & Labrador	28,863	62	466	1.79	1
Prince Edward Island	12,986	11	1,181	0.71	10
Nova Scotia	62,652	97	646	1.29	2

Saskatchewan	75,453	88	857	0.97	4
Alberta	273,826	318	861	0.97	5
British Columbia	338,188	300	1,127	0.74	8
Yukon / NWT / Nunavut	8,728	7	1,247	0.67	9
Total, Residents of Canada	2,452,701	2,939	835	1.00	

* Data shown refers to province of residence of admitted students, irrespective of the province of location of the medical faculty in which students are studying.

¹ Excludes repeaters

² “**Relative opportunity**” compares the population per place for each province with that of the national average. A number greater than 1.00 illustrates a greater than average opportunity; a number less than 1.00 shows a lower than average opportunity.

³ At Université de Montréal, first time, first year includes those students promoted from *année préparatoire*.

Notes:

Mandatory = rotations in specific disciplines which must be completed by each student.

Electives = optional programs which are the choice of students provided the choices are approved.

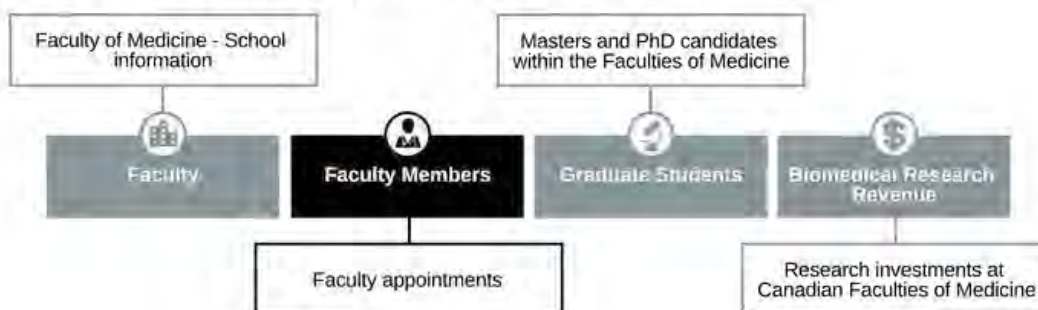

Selectives = optional programs that may be chosen from a particular set of courses.

Non-clinical = the components vary from one faculty to another; examples are: CaRMS interviews, orientation, examination review, ACLS (Advanced Cardiac Life Support).

Canadian Medical Education Statistics 2021

Section B. The AFMC Faculty Members Study — Description:

AFMC Data Holdings - *Faculties of Medicine of Canada*

The Faculty Members Study provides information on faculty members by sex, rank, discipline and clinical facilities, among others. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS-Part II), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. The AFMS data have been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section B. The AFMC Faculty Members Study – Table Contents:

Table B-1	Full-Time Faculty Members in Canadian Faculties of Medicine by Rank and Sex
Table B-2	Full-Time Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Sex
Table B-3i	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Full-Time
Table B-3ii	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Part-Time
Table B-4	Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Discipline

Section B. The AFMC Faculty Members Study – Table Notes:

1. Tables in Section B were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. The tables in Section B now contain gender-specific data for full-time and part-time faculty members (excluding table B-4). This change has been applied to all report years after, and including, 2001/02; it is broken down by discipline (table B-2), and faculty of medicine (table B-3).
3. See APPENDIX A for Classification of Disciplines.
4. See APPENDIX B for definition of "Full-Time Faculty" for the 2019/20 report year.

Canadian Medical Education Statistics 2021

Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study — Description:

The Graduate Medical Education Study provides information on graduate students at the Masters and PhD level in the Faculties of Medicine including degrees awarded by discipline, years of study, and enrolment. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. The GME study has been published in the CMES collection annually since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section C. The AFMC Graduate Medical Education - Masters and Doctoral (PhD) Candidates Study — Table Contents:

Table C-1	Enrolment in Graduate Studies & Postdoctoral Studies and Degrees Awarded by Discipline in Canadian Faculties of Medicine
Table C-2	Enrolment in Graduate Studies and Postdoctoral Studies in Canadian Faculties of Medicine by Discipline
Table C-3	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Masters
Table C-4	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD
Table C-5	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Masters
Table C-6	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD

**Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study –
Table notes:**

1. Tables in Section C were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Enrolments include part-time students.
3. The classification of disciplines is reviewed on an on-going basis, and, as a result, subtotals reported in previous years may differ slightly from subtotals in the current year.
4. See APPENDIX A for Classification of Disciplines.

Canadian Medical Education Statistics 2021

Section D. The AFMC Biomedical Research Revenue Study – Description:

The Biomedical Research Revenue Study (formerly Biomedical and Health Care Research Revenues Study) provides detailed information on investments in biomedical and health care research at the Canadian Faculties of Medicine that conduct research. Data informing the study are primarily collected via the annual Biomedical Research Revenues Survey that collects information on funding sources, amounts, and fields of research. Biomedical research revenues data have been collected since 1977; however, the survey was conducted in paper format only until 2004, and currently the AFMC Research Revenues database includes data from 2010 onwards. The survey was revised for the 1980/81 CMES publication to improve reporting on sources of funds and disciplines, and again in 2012/13 to standardize disciplines. The Biomedical Research Revenues Survey was revised in 2016/17 to ensure consistency in reporting and to include related affiliate revenue to better measure the true impact of the Faculties of Medicine research efforts. Caution should be exercised when comparing 16/17 and later data to pre 15/16 data.

Section D. The AFMC Biomedical Research Revenue Study – Table Contents:

Table D-1	Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine
Table D-2	Biomedical Research Revenue of Canadian Faculties of Medicine by Source of Funds — Funding
Table D-3	Biomedical Research Revenue of Canadian Faculties of Medicine by Category of Funds — Funding
Table D-4	Biomedical Research Revenue of Canadian Faculties of Medicine by top 50 Funding Sources
Table D-5	Distribution of Biomedical Research Revenue of Canadian Faculties of Medicine by Region
Table D-6	Biomedical Research Revenue of Canadian Faculties of Medicine by Discipline – Amounts

Section D. The AFMC Biomedical Research Revenue Study – Table Notes:

1. Tables in Section D were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Tables in Section D have been updated in 2016/17 and 2017/18. Amounts are separately reported for entities consolidated and entities not consolidated on institution's audited financial statements.
3. Affiliated research income is now included on the AFMC. Unlike prior publications, the tables in Section D, for the first time, will contain the affiliation amounts (table D-1).

Affiliate income is included only if:

- a. The entity not consolidated must be an affiliated institution as established by an affiliation agreement with the reporting institution and
 - b. Academic staff from the reporting institution lead the sponsored research project and conduct the research at the non-consolidated affiliated institution and
 - c. The income for the sponsored research is reported in the financial statements of the non-consolidated affiliated institution and
 - d. The sponsored research would be reported in the sponsored research fund had the research been conducted at the reporting institution, rather than at the affiliated institution.
4. Where affiliate revenues are not available or are only partially available faculties were asked to provide an estimate.
 5. Affiliated research income analysis report will be demonstrated in more detail in Volume 43.

This change has been applied to all report years after, and including, 2016/17 and 2017/18.

Table D-1
Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine
2019/20

Faculty of Medicine	(\$000's) of Amount

Part II - Information on Learners

Canadian Medical Education Statistics 2021

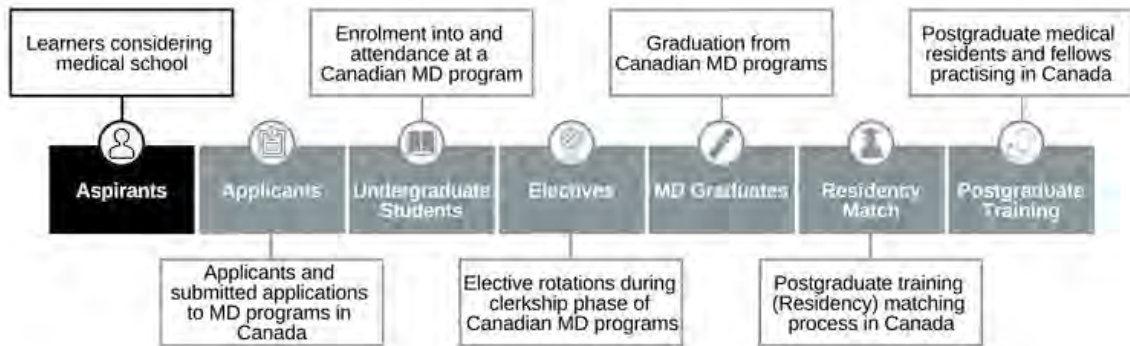

AFMC Data Holdings - *Learners Pathway to Practice*

Canadian Medical Education Statistics 2021

Section E. The AFMC Aspirants Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

AFMC continues to look for ways to improve the quality, accessibility, and equity in medical education. Recognizing that aspirants – those interested in a medical career – don't all become applicants (those who have applied – See the AFMC Applicant Study), AFMC will be studying aspirants, their motivations, and what led them to apply- or not apply- to medical school in Canada. Look to this space for studies and data on the aspirant pool.

Canadian Medical Education Statistics 2021

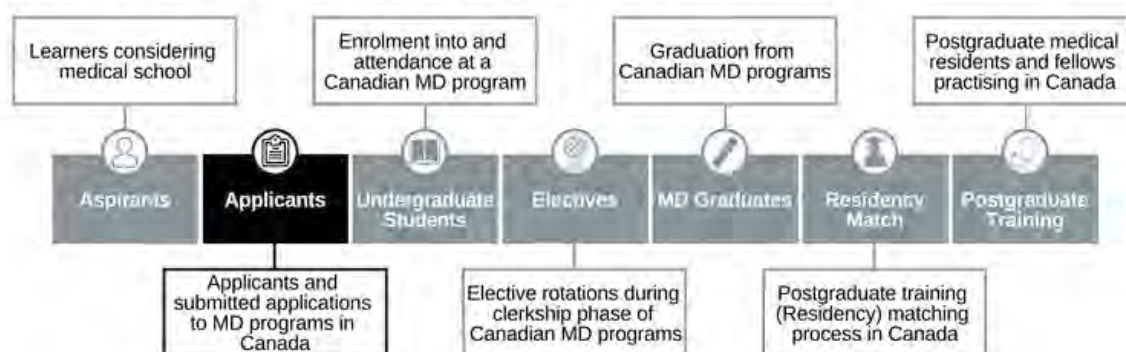

The AFMC Aspirants Study

The annual Aspirant Study will be available in a future CMES volume. The Aspirant Survey, in which this data will be collected, is still undergoing revision. For more information on these data please contact data@afmc.ca.

Canadian Medical Education Statistics 2021

Section F. The AFMC Applicants Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Applicant Study provides information on the age, sex, marital status, province/territory/foreign country of residence, citizenship status in Canada, previous educational institution, highest level of education, Medical College Admission Test (MCAT) results, how many schools applied to, new applicants or repeaters, whether or not any offers were received, and whether or not the applicant subsequently registered. The study is primarily informed via the annual AFMC Applicant Survey that collects demographic and educational information about the applicants who apply to Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Applicant Study has been published as part of the CMES collection annually since 1978, with data from 2003 onward available in our database. This edition only includes MACT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam.

Section F. The AFMC Applicants Study – Table Contents:

Table F-1	Applicants Seeking Admission to a Canadian Faculty of Medicine by Sex Compared with Population Aged 20 to 24 Years

Section F. The AFMC Applicants Study – Table Notes:

1. Tables in Section F were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. At the time of publication, MD program applicant data from University of Toronto are not available to AFMC. The following data tables exclude all applications submitted to University of Toronto.
3. In previous CMES publications, application totals from 2009 to 2014 have been missing/incomplete because Ontario faculty of medicine data was missing. This is the second CMES publication to include these missing values from the Ontario faculties of medicine.
4. For further analysis of Population Aged 20 to 24, please see Table: 17-10-0005-01 (formerly CANSIM 051-0001) at: <https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid:1710000501>
5. Some applicants who receive offer(s) of admission do not subsequently enter a Canadian faculty of medicine. Also, some applicants receive more than one offer of admission.

6. Age of applicants is calculated using their reported date of births and reference data “December 31, 2020” or “December 31, 2021”
7. Language of instruction is based on the language of the Faculty of Medicine, not an individual applicant’s first language.
8. This edition only includes MACT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam. The scoring system ranks an applicant’s score from 118 to 132 for four sub-tests constituting of: Biological and Biochemical Foundation of Living Systems, Chemical and Physical Foundations of Biological Systems, Psychological, Social and Biological Foundations of Behaviour, and Critical Analysis and Reasoning Skills (MCAT CARS). This gives a total score ranging from 472 to 528.

* University of Ottawa, Queen's University, University of Toronto, McMaster University, Western University, and NOSM University did not report data.

¹ Numbers admitted = students accepted and registered, but does not include students who were granted deferred admission.

² If male and female had equal success rates, then index = 100; index greater than 100 shows women had greater success; index less than 100 shows male had greater success.

Canadian Medical Education Statistics 2021

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Program) Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Undergraduate Medical Enrolment Study provides information on the sex, province/territory/foreign country of residence, year of study, registration status (i.e. new student, promoted from previous year, repeating same year of study, on leave of absence), campus, and position type. The study is primarily informed by the annual AFMC Enrolment Survey that collects demographic and educational information about the students registered in Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Enrolment Survey data have been published in the CMES collection annually since 1978 with data from 2003 onward available in our database.

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Programs) Study – Table Notes:

1. Tables in Section G were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. At *Université de Montréal*, students enrolled in the first year of the five-year *année préparatoire* pre-medical program were phased in and out of several medical faculties over the years. For all years and medical faculties in which such programs operated, they were systematically excluded from the enrolment series (in most cases). The same process was used for students enrolled in the MED-P program at McGill University.
3. For all medical faculties and years in which the MD was granted only upon completion of an internship year, the students in the internship year were excluded from the enrolment series.
4. **1968/69:** *Université Laval* changed from a four-year MD program to a five-year program. Laval admitted a complete class into both the four-year and five-year programs. University of Saskatchewan also introduced its five-year program. It admitted half its usual complement of students into the four-year and half into the new five-year program.
5. **1969/70:** *Université de Montréal* introduced a five-year program. It admitted two first year classes, one into the four-year and one into the five-year program. *Université Laval* and the University of Saskatchewan admitted only to the five-year programs; they both had two second-year classes, one second-year class three years from graduation and one second-year class four-years from graduation. McMaster University and Memorial University of Newfoundland each admitted its first class of medical students.
6. **1970/71:** *Université Laval* changed back to a four-year medical program for all its medical students. The newly admitted students to the four-year program as well as those entering the second year of the five-year program (admitted the previous year) were four years from graduation. Also, the third-year class consisted of an amalgamation of those three years from graduation in the five-year program and two years from graduation in the four-year program. University of Calgary admitted its first class of medical students.

7. **1987/88 & 1988/89:** University of Saskatchewan changed from a five-year program to a four-year program and did not admit any students into first year. In 1988/89 students were admitted into the first year of a new four-year program.
8. **1992/93:** *Université de Montréal* changed from a five-year program to a four-year program and did not admit any students into first year. It did however admit students into a preparatory year (*année préparatoire*).
9. **1996:** A new category of foreign student commenced the MD program in Canada. These are students admitted under agreements with foreign governments or foreign educational institutions. These students pay close to full cost for their medical education.
10. **1997/98:** University of Western Ontario (UWO) failed to report complete data. For this reason, all numbers relating to UWO, and any subtotals and totals are estimated.
11. **2005/06:** Northern Ontario School of Medicine admitted its first class of medical students into Year 1.
12. **2021:** Sherbrooke only submitted counts for enrolment of first-year students.

Table G-1
Enrolment in Canadian Faculties of Medicine by Sex
1992/93 to 2021/22

Year	Male	Female	Total	% Female
1992/93	3,817	3,224	7,041	45.8

2021/22	226	2,749	24	2,999	8,089	37	9	46	96	11,230

¹ A small number of the students admitted with advanced standing each year are transfers from one Canadian faculty of medicine to another (at most 2 per year).

² The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested a prolonged period of study.

Table G-5
Enrolment in Canadian Faculties of Medicine by Campus

¹ The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested that they prolong their period of study.

† Students admitted with advanced standing who were transfers from another Canadian medical faculty were not first-time admissions to the system as a whole, although the students were enrolled for the first time at the faculty of medicine in which they were registered in the previous year. There were no students who transferred from one Canadian medical faculty to another this year.

Attrition rates were calculated as follows:

- 1) All students enrolled during the 2020/21 academic year and who had definitely dropped out by September 2021 are included, irrespective of reason for drop-out.
- 2) Students who were on leaves of absence during the 2020/21 academic year and who were expected to return to medical studies during the 2020/21 academic year are included if they did not enrol in 2021/22 and the Faculty of Medicine confirmed that they would not be returning at a later date. Students whose leaves of absence were extended, for whatever reason, are not counted as drop-outs.
- 3) Students who were expected to graduate in 2021 and who were later reported on the "List of Graduating Students, 2021" as drop-outs are included in these counts.

Canadian Medical Education Statistics 2021

Section H. The AFMC Graduates Study (MD Programs) – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC MD Graduates Study provides information on the sex, province/territory/foreign country of residence, date of receipt of MD degree, MD degree awarding faculty, campus, first post-MD residency placement location, and specialty of MD graduates. The study is informed by the annual AFMC Survey of MD Graduates that collects demographic and educational information about the students who received the Doctor of Medicine (MD) degree at one of the seventeen Canadian Faculties of Medicine. The Study has been published as part of the CMES collection annually since 1978 with data from 2003 onward available in our database.

Graph H-4/5	MD Degrees Awarded by Canadian Universities by Age and Language of Instruction (2021 calendar year)

Section H. The AFMC Graduates Study (MD Programs) – Table Notes:

- Tables in Section H were renumbered in Volume 40 for better readability. Please see APPENDIX D for references to the table numbers of the previous years' publications.
- During 1983/84, the Data and Information Services of AFMC carried out a retrospective survey of the number of MDs awarded by Canadian universities since 1940. Each university was surveyed individually. The retrospective survey was conducted both to check on the accuracy of the data available at AFMC and to extend the series backwards in time. No reliable information was available on the number of MDs earned by women earlier than 1955 and the retrospective survey provided an opportunity to include information on the number of MDs earned by women each year since 1940. For seven of Canada's seventeen Faculties of Medicine this historic series covers the entire period of their operation as MD awarding institutions. This corrected series, which has been as carefully checked as possible given the passage of time, replaces data on this topic published prior to the 1984 edition of CMES.
- The MD was awarded for the first time in:
 - 1951 by University of Ottawa,
 - 1954 by University of British Columbia,
 - 1957 by University of Saskatchewan,
 - 1970 by Université de Sherbrooke,
 - 1972 by McMaster University,
 - 1973 by Memorial University of Newfoundland,
 - 1973 by University of Calgary, and
 - 2009 by NOSM University

* All other universities have awarded the MD during the entire period covered by this series.
- Two classes graduated in the same year:

- Dalhousie University	1943; 1974
- Université Laval	1946; 1949; 1965; 1972
- Université de Montréal	1965
- McGill University	1943
- University of Ottawa	1955
- Queen's University	1943
- University of Toronto	1943
- University of Western Ontario	1943; 1950
- University of Manitoba	1945; 1957
- University of Alberta	1943; 1948

Total					2,862

¹ Permanent Resident includes refugees and refugee claimants.

² For the first time in 1998, foreign students graduated from various Canadian universities, but were enrolled in above-quota, contract positions. The following numbers of graduates of Canadian universities were in above-quota, contract positions:

Year of MD	Number	Year of MD	Number	Year of MD	Number
2010	20	2014	8	2018	12
2011	12	2015	4	2019	13
2012	7	2016	8	2020	7
2013	7	2017	10	2021	N/A

Canadian Medical Education Statistics 2021

Section I – The AFMC Post-MD Clinical (Residency - PGY) Training Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Post-MD Clinical (PGY) Training Study provides information on faculty of postgraduate training, Faculty of MD (graduates of Canadian MD programs only), legal status, age, sex, and field of post-MD training. The data informing the study are collected from and presented on behalf of the Canadian Post-M.D. Education Registry (CAPER), which is the central repository for statistical information on postgraduate medical education in Canada. CAPER maintains individual-level data on postgraduate medical residents and fellows provided by the seventeen Canadian Faculties of Medicine. Data are captured longitudinally, from the time of entry to training, to the year of exit and to practice location following post-M.D. training. CAPER was established in 1988 and is the definitive source of data on Post-MD training in Canada.

For questions on this study CAPER can be reached at caper@afmc.ca or online at <https://caper.ca/>

Table I-20	Post-MD Year 1 Trainees in Canadian Faculties of Medicine by Type of Training, Sex and Language of Instruction

Section I. The AFMC Post-MD Clinical (Residency - PGY) Training Study – Table Notes:

1. Tables in Section I were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.

2. All data in these tables are as reported to CAPER by the seventeen faculties of medicine of Canada. The data are carefully scrutinized and referred back to the faculty of medicine for clarification when problem situations appear to exist.

All data reported in these tables, unless otherwise indicated, refer to the number of trainees occupying posts on 1 November 2020. Comparative data for previous years is also included (for earlier data, please contact the Office of Research, AFMC). It is important to bear in mind that these data refer to incumbents of training positions, i.e. trainees, and not to positions. If some positions for which funds are available were unfilled, they are not reported in the data. All these trainees were under the supervision of one of the seventeen medical schools in Canada.

Conventions as to how residents are ranked have varied from one faculty of medicine to another. In the past an PGY-1 is not necessarily an individual in the first year of a training program. In these tables, all trainees who are in their first year of post-MD training are classified as "Post-MD year 1"; other trainees who in earlier years were not in their first year of training but were ranked for payment purposes at the PGY-1 level were classified as "PGY-1 (previous graduates)". Since the phasing out of the rotating internship, this particular classification problem of post-MD trainees by rank has been resolved.

Beginning with the 1994/95 data, there are very few trainees in general medicine. Pre-licensure internships no longer exist in Canada as most licensing authorities have moved to a two-year pre-licensure training requirement. Only in exceptional cases will trainees proceed to licensure other than through family medicine or specialty training.

Beginning with the 1995/96 data, cardio-thoracic surgery was phased out of the Royal College of Physicians and Surgeons of Canada certification program. It will eventually be replaced with cardiac surgery and thoracic surgery, which are now considered specialties rather than sub-specialties.

For additional information regarding post-MD training in Canada, see the Canadian Post-M.D. Education Registry (CAPER) website (<http://www.caper.ca>).

In the data for trainees in positions on 1 November, some fields of training have been reported under more general fields.

3. Fields of Training:

- Family medicine includes care of the elderly, emergency medicine, and other enhanced training following family medicine certified by the College of Family Physicians of Canada
- Anesthesiology includes critical care anaesthesia and pain medicine
- Diagnostic radiology includes interventional radiology and neuroradiology
- Emergency medicine includes critical care emergency medicine
- Internal medicine includes general internal medicine, occupational medicine, and transfusion medicine
- Other pediatric subspecialties includes adolescent medicine, pediatric cardiology, clinical immunology/allergy, clinical pharmacology/toxicology, critical care, developmental pediatrics, emergency medicine, endocrinology/metabolism, gastroenterology, hematology/oncology, infectious diseases, nephrology, neurology, radiology, respiratory medicine, and rheumatology
- Psychiatry includes child and adolescent psychiatry, forensic psychiatry, and geriatric psychiatry

- Public Health & Preventive Medicine includes community medicine
- Anatomical pathology includes forensic medicine (anatomical)
- General pathology includes forensic medicine (general)
- Hematological pathology includes transfusion pathology
- Obstetrics/gynecology includes gynecologic oncology, gynecologic reproductive endocrinology/infertility, and maternal/fetal medicine
- Otolaryngology includes head and neck surgery
- General surgery includes colorectal surgery and general surgical oncology
- Areas of focused competence includes addiction medicine, adult cardiac electrophysiology, adult echocardiography, adult hepatology, adult interventional cardiology, advanced heart failure and cardiac transplantation, clinician educator, cytopathology, solid organ transplantation, transfusion medicine, and trauma general surgery

NOTES FOR APPENDIX A

AFMC Classification of Academic Disciplines

Several AFMC reports are dependent on reference tables for normalizing the scientific specialties reported by faculties of medicine into predetermined broad categories (e.g. basic sciences, clinical sciences and their subcategories anatomy and cell sciences, general surgery etc.). The AFMC reference tables are located in the Standards database of the AFMC SQL server.

A recent review of the AFMC references tables and reports revealed an increasing number of reported disciplines or specializations being categorized under catch all terms (i.e. miscellaneous, other...). At the same time, counts for catch all categories have been increasing in size over the last several years. Not only are catch all categories uninformative to AFMC's audiences, but they also prevent us from recognizing emerging trends in medical education and research.

In an effort to review how we categorize academic specialties, AFMC conducted a scan of classifications schemes available in the public domain. In doing so, alternative classification schemes were described, and their characteristics were assessed. This evaluation was particularly attentive to academic specialties previously reported in AFMC surveys describing graduate student field of studies, faculty departments, and funded biomedical/health care research revenues by member faculties.

Starting with the release of data for reference year 2016/17, the Canadian Medical Education Statistics publication was revised in order to reflect the new classification of disciplines.

APPENDIX B

Definition of "Full-Time Faculty" by Canadian Faculty of Medicine

Each faculty of medicine has its own definition of "full-time". Listed below are the definitions as provided to AFMC on the AFMC Annual Faculty of Medicine Survey (AFMS).

Memorial University of Newfoundland:	Position that is tenured, tenure track or contractual - working full-time hours
Dalhousie University:	<p>Full-time faculty are those faculty members with a 1.00 FTE and are:</p> <ul style="list-style-type: none"> • a member of the Dalhousie Faculty Association (DFA); or • part of a clinical department academic funding plan (AFP); or • a non-AFP member of a clinical department at a major teaching site. <p>Note: Part-time faculty are those members with an FTE less than 1.0 and includes limited term post-retirement and adjunct appointments.</p>
Université Laval:	<p>Full-time faculty are salaried employees of Laval University who have the title of professor (full), associate professor, assistant professor, or other educators (lecturers in medicine and practical training officers).</p> <p>Since the 2013-2014 report, we have brought some changes to the definitions of "part-time". We have included all the people who have not been counted as "full-time", but who have an official status at the Faculty of Medicine of Laval University (clinical instructors, clinical professors, and associate professors).</p> <p>In respect of dividing them into "paid" and "volunteers", we have taken into account recent agreements between the government and the federations of physicians (FMOQ and FMSQ), which provide compensation for supervising clerks and residents as well as for some teaching activities in clinical settings. So, people in the "part-time" category are now considered as "paid, save for some exceptions. These exceptions appearing in the "volunteer" column refer to people who have received no pay from the faculty and who belong to the kinesiology and rehabilitation departments. Associate professors of all departments that have not been compensated by the faculty have been counted as "volunteers".</p>
Université de Sherbrooke:	Full-time faculty devote 100% of their time to engage in teaching, research, and clinical responsibilities.
Université de Montréal:	A faculty member is considered full-time if 75% of his time is allocated to instruction, research, administration or any scholarship of professional activity related to medical education.
McGill University:	All full-time PhD staff and geographic full-time (university) and (hospital) appointees.
University of Ottawa:	<p>REGULAR FACULTY MEMBER: a member of the academic staff, holding a regular appointment, who is in the bargaining unit as prescribed by the Association of Professors of the University of Ottawa Collective Agreement (APUO).</p> <p>FULL-TIME ACADEMIC: as defined in the Faculty Appointments Advisory Committee manual: Category (Full-time/Part-time). Each of the categories of academic appointment will be differentiated by the amount of time dedicated to academic work on average over the course of the year.</p> <p>Full-time: The physician or clinical scientist (PhD) spends four (4) full days or greater per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa.</p>

continued

APPENDIX B (continued)

University of Ottawa (cont'd):	Part-time: The physician or clinical scientist (PhD) spends between one (1) and four (4) days per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa. The number of days per week shall be agreed to in the Letter of Agreement (LOA).
Queen's University:	Those who are appointed with appropriate academic rank whose responsibilities include education/teaching, research/scholarship, and administration. The responsibilities of full-time clinical faculty also include the provision of clinical service within their discipline.
University of Toronto:	<p>Full-time Faculty:</p> <ul style="list-style-type: none"> - Includes all full-time clinical (MD) faculty appointed under the Clinical Faculty Policy and all full-time tenured/tenure-stream, teaching stream and contractually limited term appointments. - Full-time clinical (MD) faculty are engaged in academic activities for at least 80% of their professional time. All other full-time faculty have a 100% FTE salaried appointment at the University of Toronto. <p>Total number of full-time faculty members who are tenured or within the tenure stream: This year's total is a more accurate number and includes continuing Faculty in the Tenure, Tenure-Stream, and Teaching-Stream. In previous years, this number included Non-Tenure Stream Faculty.</p>
McMaster University:	Full-time faculty are those appointed under the McMaster University Revised Policy and Regulations with Respect to Academic Appointment, Tenure and Promotion. Full-time faculty are those holding an academic appointment that is at least 0.75 FTE.
Western University:	<p><u>Full-Time Faculty with Clinical Appointments (Physicians):</u> "Clinical Academic" Is the appointment category of a clinician who is generally located in a teaching hospital, Family Medical Centre or other teaching unit contributes to the academic mission of the University with an on-going continuing commitment; may be remunerated for academic contributions through a department or program merit-based reward system; and may be required to participate in a departmental practice plan.</p> <p><u>Full-Time Faculty with UWOFA/Basic Science Appointments:</u> Any faculty member who is a Member of The University of Western Ontario Faculty Association, holding a limited term, probationary, tenured, externally funded or visiting (with remuneration) appointment is classified as full-time.</p>
Northern Ontario School of Medicine:	The Northern Ontario School of Medicine has three Divisions: Clinical, Medical and Human Sciences. It has predominantly part-time faculty in the Division of Clinical Sciences. Faculty members in the other Divisions are considered full-time if they have no appointments at other institutions and if at least 50% of their salary is paid by NOSM.
University of Manitoba:	As per the University of Manitoba-University of Manitoba Faculty Association 2016-2017 Collective Agreement (Available online: http://umanitoba.ca/admin/human_resources/staff_relations/media/Final_draft_version_2016_2017_UMFA_Collective_Agreement_with_signatures.pdf), a full-time faculty member is defined as an academic staff member with the rank of Professor, Associate Professor, Assistant Professor or Lecturer who is appointed for a normal work load (i.e.: 1.0 FTE or 40 hours per week).

continued

APPENDIX B (continued)

- University of Saskatchewan:** The College of Medicine, University of Saskatchewan (CoM) has revised its definitions of faculty in accordance with governance and leadership restructuring in the College. We no longer use the designations “full-time” and “part-time” for our MD clinical faculty, except for those who are employees of the University. As an intentional component of our restructuring, the College no longer offers employment to clinicians but continues to recruit medical faculty to engage academically as self-employed contractors. As of mid-2016, only 30 clinicians remained employed by the University, while the much larger self-employed cohort is made up of clinicians for whom the designations “full-time” and “part-time” have no real relevance. Academic assignments and deliverables are discussed with all faculty on an annual basis, irrespective of their employed or self-employed status.
- Our designation for “full-time faculty members” is reserved for those faculty who are employees of the university with an FTE of 1.0 only. The group includes most of the College's Senior Administration Leaders (Department Heads, Unified Department Heads, Associate Deans, Vice Deans and the Dean), our biomedical scientists, our population health scientists, some clinicians and some of our School of Physical Therapy faculty. The source reporting data for this group is the January 2017 HRD records of the University. The source for the PAID numbers (reported as VOL in previous years) is our CoM's database for active appointments as of January 1, 2017.
- University of Alberta:** Board/AAS:UA Agreement (Faculty), Clause 1.03 "Staff" and "staff member" refer to all those persons who have been appointed to full-time teaching and research positions on the academic staff of the University of Alberta in which the appointee has, or may be granted, a continuing appointment. (GFC 31 MAY 1982).
- University of Calgary:** Full-time faculty members are appointed as full-time regular members of the University's academic staff and receive a rank salary in accordance with the academic salary scales of the University.
- University of British Columbia:** Full-time Faculty Members means all persons appointed by the UBC Board of Governors on a full-time basis as Instructor, Senior Instructor, Lecturer, Assistant Professor, Associate Professor, Professor, or equivalent position.

NOTES FOR APPENDIX B

Definition of "Full-Time Faculty" by Canadian Faculty of Medicine

Definitions of "full-time" vary from one faculty of medicine to another and sometimes from year to year within the same faculty. The following faculties changed definitions:

1992/93	Université de Montréal, University of Toronto
1999/00	Western University
2000/01	Dalhousie University, Université de Montréal, Western University
2001/02	Western University
2003/04	University of Ottawa, Western University, University of Manitoba, University of Alberta
2004/05	Dalhousie University
2005/06	University of Alberta
2006/07	Université de Montréal, University of Ottawa
2007/08	Queen's University, University of Toronto, Northern Ontario School of Medicine, University of Manitoba
2008/09	University of Ottawa, University of Toronto
2009/10	Université de Montréal, University of Ottawa, University of Toronto
2010/11	Queen's University, University of Toronto, Western University
2012/13	University of Toronto, University of Manitoba
2013/14	Université Laval
2016/17	Université Laval, University of Manitoba, University of Saskatchewan

CMES Table Cross-Reference

CMES 2018 Vol. 40 is the first version of the CMES publication to feature a new Table naming system. New tables have been added, and all tables have been re-arranged and organized into new and revised sections. This section will help guide you in finding the tables and graphs found in Vol. 42 in older volumes of the CMES publication (up to 5 years).

Table Name	Table				
	CMES 2021 Vol. 43	CMES 2020 Vol. 42	CMES 2019 Vol. 41	CMES 2018 Vol. 40	CMES 2017 Vol. 39
Accredited Canadian Faculties of Medicine	A-1	A-1	A-1	A-1	1
