

THE PROJECT CHAMPION'S DISCUSSION POINTS

PROJECT OVERVIEW

The opioid crisis continues to be a growing national emergency. Populations adversely affected by the social determinants of health, trauma and oppression are more likely to experience adverse events. There is also a discordance between the increase in opioid-related harm and medical education on opioid prescribing and non-cancer chronic pain. According to a survey of incoming PGY-1 residents, approximately 63.5% (n = 273) were not at all comfortable with managing opioid therapy.

The Response to Opioid Crisis curriculum is a timely opportunity to approach the opioid crisis and further educate stakeholders, including faculty, preceptors, residents, and medical students, about opioids, their appropriate use and response to misuse.

As a project champion, you can share this curriculum with your network of educational leaders, curriculum leads and interested learners. This national curriculum is available in English and French, and online through medical schools free of charge.

INTENDED AUDIENCE

- ✓ Modules for students, residents, fellows, and physicians in practice
- ✓ Medical student curriculum designed to move with students through their medical education
- ✓ Modules can be integrated into the curriculum or used for independent learning
- ✓ Resident and continuing professional development modules are designed to be free-standing

MANAGEMENT AND ADDICTION MEDICINE

HOW TO ACCESS SHARED RESOURCES

Medical students can register without cost for the UGME, PGME and CPD curricula through the AFMC [opioid website](https://opioids.afmc.ca).

Curriculum content is updated annually.

Links to curriculum and companion guides to be shared upon request.

Additional resources such as Faculty Development Tools and a Simulation Playbook of case-based scenarios are available on the AFMC [opioid website](https://opioids.afmc.ca).

AVAILABLE UGME MODULES

1. The Public Health Perspective
2. Core Concepts in Pain
3. Core Concepts in the Management of Chronic Pain
4. Pathophysiology of Pain and Pharmacology of Opioids
5. Opioid Prescribing
6. Opioid Stewardship in Palliative Care
7. Safe Storage and Proper Disposal of Opioids
8. Recognizing Opioid Use Disorder
9. Management of Opioid Use Disorder
10. Cultural Considerations, Legalities, and Enhancing Competence

AVAILABLE PGME MODULES

1. Building Relationships with Individuals: Navigating Difficult Conversations
2. Opioid Stewardship: Prescribing and Management
3. Opioid Stewardship: Rotation and Deprescribing
4. Medical Addiction Treatment
5. Management of Chronic Pain in Differing Contexts
6. Cancer-related Pain
7. Advanced Knowledge of Pain Management
8. Management of Chronic Pain

AVAILABLE CPD MODULES

1. Injectable Opioid Agonist Treatment (iOAT)
2. Physician Liability
3. Chronic Pain and Opioid Use in the Elderly
4. Women's Health
5. Pediatrics: Continuum of Care from Birth to Later Years
6. Emergency Medicine
7. Psychiatry
8. Hospital-based Medicine
