Section F. The AFMC Applicants Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Applicant Study provides information on the age, sex, marital status, province / territory / foreign country of residence, citizenship status in Canada, previous educational institution, highest level of education, Medical College Admission Test (MCAT) results, how many schools applied to, new applicants or repeaters, whether or not any offers were received, and whether or not the applicant subsequently registered. The study is primarily informed via the annual AFMC Applicant Survey that collects demographic and educational information about the applicants who apply to Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Applicant Study has been published as part of the CMES collection annually since 1978, with data from 2003 onward available in our database. This edition only includes MCAT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam.

Section F. The AFMC Applicants Study – Table Notes:

1. Tables in Section F were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. At the time of publication, MD program applicant data from University of Toronto are not available to AFMC. The following data tables exclude all applications submitted to University of Toronto.
3. In previous CMES publications, application totals from 2009 to 2014 have been missing/incomplete because Ontario faculty of medicine data was missing. This is the second CMES publication to include these missing values from the Ontario faculties of medicine.

4. For further analysis of Population Aged 20 to 24, please see Table: 17-10-0005-01 (formerly CANSIM 051-0001) at: <https://www150.statcan.gc.ca/t1/tbl1/en/tv.action?pid=1710000501>
5. Some applicants who receive offer(s) of admission do not subsequently enter a Canadian faculty of medicine. Also, some applicants receive more than one offer of admission.
6. Age of applicants is calculated using their reported date of births and reference data “December 31, 2022.”
7. Language of instruction is based on the language of the Faculty of Medicine, not an individual applicant’s first language.
8. This edition only includes MCAT score information from the 2015 MCAT test. The scoring system ranks an applicant’s score from 118 to 132 for four sub-tests constituting of: Biological and Biochemical Foundation of Living Systems, Chemical and Physical Foundations of Biological Systems, Psychological, Social and Biological Foundations of Behaviour, and Critical Analysis and Reasoning Skills (MCAT CARS). This gives a total score ranging from 472 to 528.
