

Canadian Medical Education Statistics 2022

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Program) Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Undergraduate Medical Enrolment Study provides information on the sex, province/territory/foreign country of residence, year of study, registration status (i.e. new student, promoted from previous year, repeating same year of study, on leave of absence), campus, and position type. The study is primarily informed by the annual AFMC Enrolment Survey that collects demographic and educational information about the students registered in Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Enrolment Survey data have been published in the CMES collection annually since 1978 with data from 2003 onward available in our database.

Table G-14	Non-Canadians Enrolled in Canadian Faculties of Medicine by Year of Study and Legal Status in Canada
Table G-15	Non-Canadians Enrolled in Canadian Faculties of Medicine by Legal Status in Canada and Country of Citizenship
Table G-16	Enrolment in Canadian Faculties of Medicine by Residence of Province
Table G-17	Enrolment in Year 1 for the First Time in Canadian Faculties of Medicine by Residence of Province
Table G-18	Enrolment Status of Students in Canadian Faculties of Medicine by Faculty of Medicine
Table G-19	Enrolment Status of Students in Canadian Faculties of Medicine by Year of Study
Table G-20	First-Time Enrolment Status of Students in Canadian Faculties of Medicine by Faculty of Medicine, Year of Study and Legal Status in Canada
Table G-21	Attrition (by September 2022) of Students Enrolled in Canadian Faculties of Medicine in 2021/22 by Faculty of Medicine and Year of Study

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Programs) Study – Table Notes:

1. Tables in Section G were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. At *Université de Montréal*, students enrolled in the first year of the five-year *année préparatoire* pre-medical program were phased in and out of several medical faculties over the years. For all years and medical faculties in which such programs operated, they were systematically excluded from the enrolment series (in most cases).
3. For all medical faculties and years in which the MD was granted only upon completion of an internship year, the students in the internship year were excluded from the enrolment series.
4. **1968/69:** *Université Laval* changed from a four-year MD program to a five-year program. Laval admitted a complete class into both the four-year and five-year programs. University of Saskatchewan also introduced its five-year program. It admitted half its usual complement of students into the four-year and half into the new five-year program.
5. **1969/70:** *Université de Montréal* introduced a five-year program. It admitted two first year classes, one into the four-year and one into the five-year program. *Université Laval* and the University of Saskatchewan admitted only to the five-year programs; they both had two second-year classes, one second-year class three years from graduation and one second-year class four-years from graduation. McMaster University and Memorial University of Newfoundland each admitted its first class of medical students.
6. **1970/71:** *Université Laval* changed back to a four-year medical program for all its medical students. The newly admitted students to the four-year program as well as those entering the second year of the five-year program (admitted the previous year) were four years from graduation. Also, the third-year class consisted of an amalgamation of those three years from graduation in the five-year program and two years from graduation in the four-year program. University of Calgary admitted its first class of medical students.

7. **1987/88 & 1988/89:** University of Saskatchewan changed from a five-year program to a four-year program and did not admit any students into first year. In 1988/89 students were admitted into the first year of a new four-year program.
8. **1992/93:** *Université de Montréal* changed from a five-year program to a four-year program and did not admit any students into first year. It did however admit students into a preparatory year (*année préparatoire*).
9. **1996:** A new category of foreign student commenced the MD program in Canada. These are students admitted under agreements with foreign governments or foreign educational institutions. These students pay close to full cost for their medical education.
10. **1997/98:** University of Western Ontario (UWO) failed to report complete data. For this reason, all numbers relating to UWO, and any subtotals and totals are estimated.
11. **2005/06:** Northern Ontario School of Medicine admitted its first class of medical students into Year 1.
12. **2021 and 2022:** Sherbrooke only submitted counts for enrolment of first-year students.

Table G-1
Enrolment in Canadian Faculties of Medicine by Sex
1993/94 to 2022/23

Year	Male	Female	Total	% Female
1993/94	3,616	3,300	6,916	47.7
1994/95	3,496	3,324	6,820	48.7

2022/23	229	2,835	23	3,087	7,876	128	13	141	309	11,413

¹ A small number of the students admitted with advanced standing each year are transfers from one Canadian faculty of medicine to another (at most 2 per year).

² The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested a prolonged period of study.

¹ Students listed as five years plus to graduation are students who choose to extend their program of study over five years. Also included are students enrolled in *année préparatoire* for the four-year program at *Université de Montréal*.

² Students at *Université Laval* have the option to spread their MD program over five years instead of four years. The number who are five years from graduation include an estimate of those students already enrolled in year 1 who opt to prolong their program; those reported as being four years from graduation include those in year 1 who intend to complete the program in 4 years and those in year 2 who intend to take an additional year; those reported as being three years from graduation include those in year 2 who intend to complete the program in 4 years and those in year 3 who intend to take an additional year.

¹ The option to prolong study is now available to students in some faculties of medicine. For this reason the category "repeaters" has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested that they prolong their period of study.

Table G-19

† Students admitted with advanced standing who were transfers from another Canadian medical faculty were not first-time admissions to the system as a whole, although the students were enrolled for the first time at the faculty of medicine in which they were registered in the previous year. There were no students who transferred from one Canadian medical faculty to another this year.

Attrition	0	0	0	2	2	4	3	1	4	0	0	0	5	3	8
Enrolment, Sept. 2022	80	146	226	1,110	1,846	2,956	2,195	3,081	5,276	1,170	1,501	2,671	4,555	6,574	11,129
Attrition as % of enrolment	0	0	0	0.18	0.11	0.14	0.14	0.03	0.08	0.00	0.00	0.00	0.11	0.05	0.07

Attrition rates were calculated as follows:

- 1) All students enrolled during the 2021/22 academic year and who had definitely dropped out by September 2022 are included, irrespective of reason for drop-out.
- 2) Students who were on leaves of absence during the 2021/22 academic year and who were expected to return to medical studies during the 2021/22 academic year are included if they did not enrol in 2022/23 and the Faculty of Medicine confirmed that they would not be returning at a later date. Students whose leaves of absence were extended, for whatever reason, are not counted as drop-outs.
- 3) Students who were expected to graduate in 2022 and who were later reported on the "List of Graduating Students, 2022" as drop-outs are included in these counts.
