ACKNOWLEDGEMENTS

AFMC's Data and Information Services Team is pleased to present Volume 46 in its annual series of statistical publications related to medical education in Canada.

The assembly of the information contained in this publication involved many people and organizations who gave generously of their time and resources.

AFMC would like to thank the deans of Canada's faculties of medicine and those members of their staff who responded to the numerous questionnaires and requests for information.

Canadian Medical Education Statistics 2024

Background

Canadian Medical Education Statistics (CMES) is a collection of results from several annual studies conducted by AFMC's Data and Information Services team.

AFMC's Data and Information Services team manages the national repository of information on faculties of medicine across Canada. Formerly known as the Office of Research and Information Services (ORIS), this service was established in 1985 as a division of research and data collection at AFMC. With over 40 years of data holdings – primarily focused on undergraduate medical education – it provides expertise in data analysis and interpretation through longitudinal studies and trend analysis.

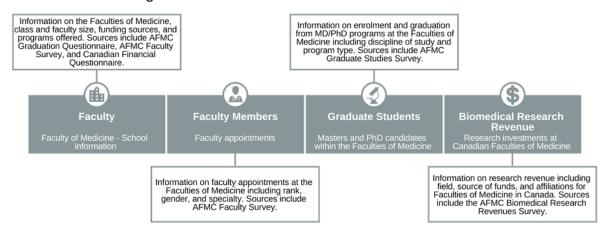

With this data, AFMC is the source of information on physician inflow and output through Canada's undergraduate and postgraduate training system, the number and types of doctors trained, and how they are distributed and move throughout Canada. AFMC also gathers data pertaining to our faculties of medicine such as their faculty complements, curriculum offerings, tuition fees, and research revenues.

The information published by AFMC in the Canadian Medical Education Statistics collection is based on data gathered through surveys of medical schools and learners. This data is used by the Canadian faculties of medicine, the federal government, provincial/territorial ministries of health, and private industries, as well as AFMC's constituents.

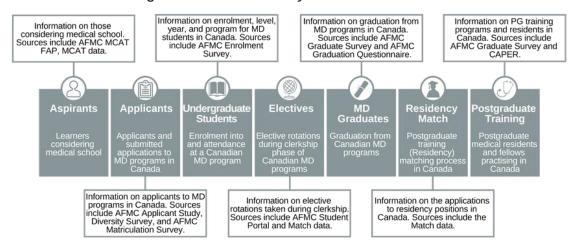

The Canadian Medical Education Statistics collection is organized into two parts, one focusing on the Faculties of Medicine themselves, and the second on the Pathway to Practice – that is, learners moving through the Medical Education system to become practicing providers. Data holdings for these two parts are summarized graphically below.

Canadian Medical Education Statistics 2024

AFMC Data Holdings - Faculties of Medicine of Canada

AFMC Data Holdings - Learners Pathway to Practice

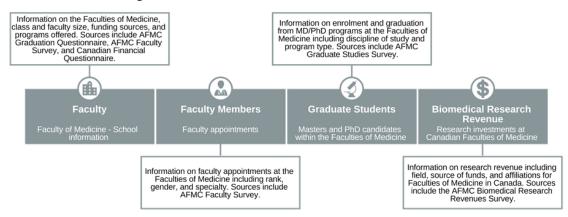

Part I - Information on Faculties

Canadian Medical Education Statistics 2024

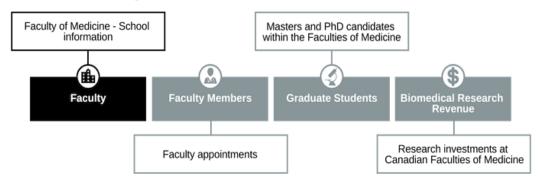

AFMC Data Holdings - Faculties of Medicine of Canada

Canadian Medical Education Statistics 2024

Section A. AFMC Faculties of Medicine Data – Description:

AFMC Data Holdings - Faculties of Medicine of Canada

Section A contains information about the seventeen Canadian Faculties of Medicine. This section provides information on quotas for first-year positions, duration of clinical clerkships and stipend amounts, tuition and other fees, post-M.D. trainee fees and remuneration, and other information about the Faculties of Medicine. This data is collected primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual two-part survey collecting statistical information about Canadian faculties of medicine on a number of topics. AFMS data has been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section A. The	Section A. The AFMC Faculties of Medicine Data – Table Contents:								
Table A-1	Accredited Canadian Faculties of Medicine								
Table A-2i	Information About Canadian Faculties of Medicine								
Table A-2ii	Quota Allocation in Canadian Faculties of Medicine								
Table A-3	Tuition Fees and Other Fees in Canadian Faculties of Medicine: Session Commencing Fall 2024								
Table A-4	Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine by Province of Residence								
Table A-5	Payment Scales for Post-MD Clinical Trainees in Canadian Faculties of Medicine by Rank and Province of Training								
Table A-6	Post-MD Clinical Trainee Fees in Canadian Faculties of Medicine								
Table A-7	Duration of Clinical Clerkship and Amount of Stipend in Canadian Faculties of Medicine								

Section A. The AFMC Faculties of Medicine Data — Table Notes:

- 1. Tables in Section A were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. Table A-6 contains detailed footnotes on the breakdown of Post-MD Clinical Training Fees for most Canadian Faculties of Medicine.
- 3. Table A-7 contains information on the duration of clinical clerkship and the amount of stipend given to each Canadian Faculty of Medicine. Monthly payments are not always disbursed over the full duration of clerkship, per stipend. The faculties of medicine may offer additional clerkship opportunities such as integrated clerkships which differ in clerkship lengths and educational requirements.

¹ Regular quota numbers include positions for foreign students, as well as specific quota positions.

² Above Quota refers to positions outside regular quotas, including additional seats for Canadian learners (e.g., those funded by federal or provincial programs, or designated for Indigenous, rural, or Francophone minority communities) and for foreign learners admitted under contracts with foreign governments or institutions on a cost-recovery basis.

³ See Table A-2ii for details.

⁴ Université de Montréal's MD program is four years, or five years for students who first enrol in the one-year preparatory program (*année préparatoire*).

These figures are valid for 2024/25. They are subject to change in subsequent years.

^{*} No quota reported in this category

¹ Up to 12 positions available to eligible First Nations and Inuit / Indigenous applicants who are residents of Quebec; these positions are distributed among the four Quebec faculties of medicine. Up to 4 positions funded by the Canadian Forces Medical Military Training Program (MMTP), distributed among the four Quebec faculties of medicine that offer medical training in French: McGill University (Campus Outaouais only), Université de Sherbrooke, Université de Montréal and Université Laval.

² Other Above Quota refers to additional positions for Canadian learners (such as those funded by NWT, positions for rural students, and positions designated through the Consortium national de formation en santé for students from Francophone minority communities outside Quebec) as well as positions for foreign learners admitted under cost-recovery agreements with foreign governments or institutions.

Note: Unless otherwise noted, fees are for in-province residents; some schools charge a small surcharge for out-of-province learners.

¹ Exemption from paying the foreign differential fee may be granted in some cases. These exemptions are defined by individual provincial government policies.

 $^{^{2}}$ Other compulsory fees may vary for visa students, for example, comprehensive health care insurance.

Table A-4

Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine by Province of Residence

2024/25

Province or Territory of Residence	Population Aged 20 to 24 July 1, 2024	First Time, First-Year Enrolment in 2024/25 ¹	Population Aged 20 to 24 per Place	Relative Opportunity ²	Rank
Newfoundland & Labrador	30,139	80	377	2.23	1
Prince Edward Island	14,062	12	1,172	0.72	10
Nova Scotia	65,978	104	634	1.33	3
New Brunswick	48,864	77	635	1.32	4
Quebec	518,670	948	547	1.54	2
Ontario	1,174,907	1078	1,090	0.77	8

Saskatchewan	79,633	103	773	1.09	5
Alberta	309,865	374	829	1.01	7
British Columbia	381,444	336	1,135	0.74	9
Yukon / NWT / Nunavut	9,091	6	1,515	0.56	11
Total, Residents of Canada	2,744,222	3,262	841	1.00	

Data shown refers to the province of residence of admitted students, irrespective of the province of location of the medical faculty in which students are studying.

Note: At Université de Montréal, first-time, first-year enrolment includes only students newly entering Year 1, excluding those promoted from année préparatoire.

Sources of Data: Statistics Canada. Table 17-10-0005-01 Population estimates on July 1, by age and gender

Other Data: AFMC

¹ Excludes repeaters

² "Relative opportunity" compares the population per place for each province with that of the national average. A number greater than 1.00 illustrates a greater than average opportunity; a number less than 1.00 shows a lower than average opportunity.

N/A = not applicable

Note: Chief residents and senior residents may receive additional stipends.

¹ Quebec: The 2015-2021 collective agreement remains in effect until it is renewed by the negotiating parties. This salary scale includes a 2% pay increase signed on July 17, 2022, which is applicable retroactively from April 1, 2021.

² Ontario: Following the expiry of the 2020-2023 collective agreement, a new three-year agreement (July 2023 - June 2026) was established through arbitration in 2024, with the salary terms shown above retroactively effective as of July 1, 2024.

³ Saskatchewan: The 2018-2022 contract remains in effect pending negotiation of a new collective agreement.

N/A = not applicable

Notes:

Mandatory = rotations in specific disciplines which must be completed by each student.

Electives = optional programs which are the choice of students provided the choices are approved.

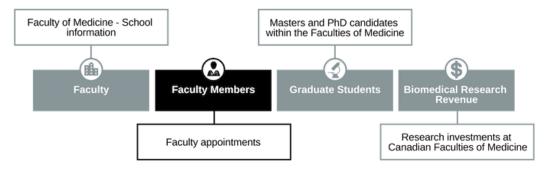

Selectives = optional programs that may be chosen from a particular set of courses.

Non-clinical = the components vary from one faculty to another; examples are: CaRMS interviews, orientation, examination review, ACLS (Advanced Cardiac Life Support).

Canadian Medical Education Statistics 2024

Section B. The AFMC Faculty Members Study — Description:

AFMC Data Holdings - Faculties of Medicine of Canada

The Faculty Members Study provides information on full-time and part-time faculty members by sex, rank and discipline. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS-Part II), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. AFMS data has been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section B. T	he AFMC Faculty Members Study – Table Contents:
Table B-1	Full-Time Faculty Members in Canadian Faculties of Medicine by Rank and Sex
Table B-2	Full-Time Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Sex
Table B-3i	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Full-Time
Table B-3ii	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Part-Time
Table B-4	Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Discipline

Section B. The AFMC Faculty Members Study – Table Notes:

- 1. Tables in Section B were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. The tables in Section B now contain sex-specific data for full-time and part-time faculty members (excluding table B-4). This change has been applied to all report years after, and including, 2001/02; it is broken down by discipline (table B-2), and faculty of medicine (table B-3).
- 3. See Appendix A for Classification of Disciplines.
- 4. See Appendix B for definition of "Full-Time Faculty" for the 2023/24 report year.

5. 2023/24:

- a. University of British Columbia did not report a breakdown by Sex for full-time or parttime faculty members. This information is expected to be available in the next data cycle.
- b. Memorial University of Newfoundland did not report a breakdown by Sex for part-time faculty members.

Notes:

- CMES 2019 (VOL 41) added two years of data on Full-Time Faculty Members: 2017/18, as well as 2018/19.
- For 2023/24, University of British Columbia did not report a breakdown by sex for full-time or part-time faculty members, and Memorial University of Newfoundland did not report this information for part-time faculty members.

Notes:

- CMES 2019 (VOL 41) added two years of data on Full-Time Faculty Members: 2017/18, as well as 2018/19.
- For 2023/24, University of British Columbia did not report a breakdown by sex for full-time or part-time faculty members, and Memorial University of Newfoundland did not report this information for part-time faculty members.

Canadian Medical Education Statistics 2024

Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study — Description:

AFMC Data Holdings - Faculties of Medicine of Canada

The Graduate Medical Education (GME) Study provides information on graduate students at the Masters and PhD level in the Faculties of Medicine including degrees awarded by discipline, years of study, and enrolment. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. The GME study has been published in the CMES collection annually since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section C. The AFMC Graduate Medical Education - Masters and Doctoral (PhD) Candidates Study — Table Contents:

Study — Table Contents:					
Table C-1	Enrolment in Graduate Studies and Postdoctoral Studies and Degrees Awarded by Discipline in Canadian Faculties of Medicine				
Table C-2	Enrolment in Graduate Studies and Postdoctoral Studies in Canadian Faculties of Medicine by Discipline				
Table C-3	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Masters				
Table C-4	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD				
Table C-5	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Masters				
Table C-6	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty				

and Discipline — Doctorates/PhD

Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study — Table notes:

- 1. Tables in Section C were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. Enrolments include part-time students.
- 3. The classification of disciplines is reviewed on an ongoing basis, and, as a result, subtotals reported in previous years may differ slightly from subtotals in the current year.
- 4. See APPENDIX A for Classification of Disciplines.
- 5. **2023/24:** University of Manitoba did not provide data on postdoctoral enrolments or on degrees awarded at the Master's (MSc) and Doctoral (PhD) levels.

Section D. The AFMC Biomedical Research Revenue Study – Description:

Faculty of Medicine - School information Masters and PhD candidates within the Faculties of Medicine Faculty Members Graduate Students Research Revenue Research investments at Canadian Faculties of Medicine

AFMC Data Holdings - Faculties of Medicine of Canada

The Biomedical Research Revenue Study (formerly Biomedical and Health Care Research Revenues Study) provides detailed information on investments in biomedical and health care research at the Canadian Faculties of Medicine that conduct research. Data informing the study are primarily collected via the annual Biomedical Research Revenues Survey that collects information on funding sources, amounts, and fields of research. Biomedical research revenues data have been collected since 1977; however, the survey was conducted only in paper format until 2004, and currently the AFMC Research Revenues database includes data from 2010 onwards. The survey was revised for the 1980/81 CMES publication to improve reporting on sources of funds and disciplines, and again in 2012/13 to standardize disciplines. The Biomedical Research Revenues Survey was revised in 2016/17 to ensure consistency in reporting and to include related affiliate revenue to better measure the true impact of research efforts across the Faculties of Medicine. Caution should be exercised when comparing 16/17 and later data to pre-15/16 data.

Section D. T	he AFMC Biomedical Research Revenue Study – Table Contents:
Table D-1	Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine
Table D-2	Biomedical Research Revenue of Canadian Faculties of Medicine by Source of Funds — Funding
Table D-3	Biomedical Research Revenue of Canadian Faculties of Medicine by Category of Funds — Funding
Table D-4	Biomedical Research Revenue of Canadian Faculties of Medicine by Top 50 Funding Sources
Table D-5	Distribution of Biomedical Research Revenue of Canadian Faculties of Medicine by Region
Table D-6	Biomedical Research Revenue of Canadian Faculties of Medicine by Discipline — Amounts

Section D. The AFMC Biomedical Research Revenue Study – Table Notes:

- 1. Tables in Section D were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. Tables in Section D have been updated in 2016/17 and 2017/18. They now separately report amounts for entities that are consolidated and those that are not, based on the institution's audited financial statements.
- 3. Affiliated research income is now included (see table D-1). Affiliate income is included only if:
 - a. The non-consolidated entity is an affiliated institution, as established by an affiliation agreement with the reporting institution.
 - b. Academic staff from the reporting institution lead the sponsored research project and conduct the research at the non-consolidated affiliated institution.
 - c. The income for the sponsored research is reported in the financial statements of the non-consolidated affiliated institution.
 - d. The sponsored research would be reported in the sponsored research fund had the research been conducted at the reporting institution, rather than at the affiliated institution.
- 4. In cases where affiliate revenues are not available or are only partially available, faculties were asked to provide an estimate.

This change has been applied to all report years after, and including, 2016/17 and 2017/18.

Table D-1

Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine 2022/23

Faculty of Medicine		(\$000's) of Amount	
racuity of Medicine	Funding	Affiliation	Total
Memorial University of Newfoundland	5,917.14	444.65	6,361.79

Four faculties did not categorize a total of \$330,442.05 in revenue by discipline: Dalhousie University (\$112,036.79), McGill University (\$168,267.63), Queen's University (\$6,235.40), and the University of Manitoba (\$43,902.23).

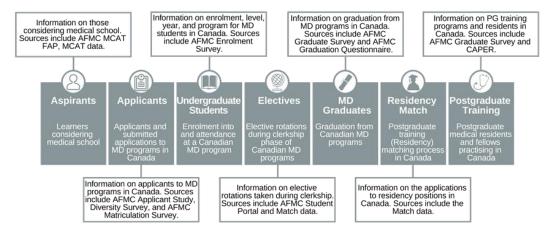

See APPENDIX A for Classification of Disciplines.

All figures are in current Canadian dollars, uncorrected for changes in purchasing power values.

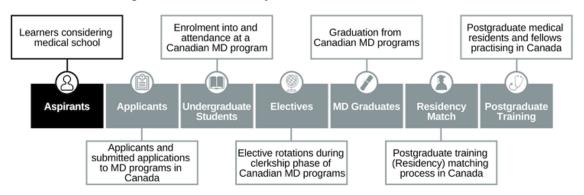

Part II - Information on Learners

AFMC Data Holdings - Learners Pathway to Practice

Section E. The AFMC Aspirants Study – Description:

AFMC Data Holdings - Learners Pathway to Practice

AFMC continues to look for ways to improve the quality, accessibility, and equity of medical education. Recognizing that aspirants – those interested in a medical career – don't all become applicants (see the AFMC Applicant Study), AFMC will be studying aspirants, their motivations, and what led them to apply or not apply to medical school in Canada. Look to this space for studies and data on the aspirant pool.

The AFMC Aspirants Study

The annual Aspirant Study will be available in a future CMES volume. The Aspirant Survey, in which this data will be collected, is still undergoing revision. For more information on these data please contact data@afmc.ca.

Section F. The AFMC Applicants Study – Description:

Canăda

Enrolment into and Postgraduate medical Graduation from Learners considering residents and fellows attendance at a Canadian MD programs medical school Canadian MD program practising in Canada **Applicants** Undergraduate Students Residency Match Postgraduate Training **Aspirants Electives** MD Graduates Applicants and Elective rotations during Postgraduate training submitted applications clerkship phase of (Residency) matching to MD programs in

Canadian MD programs

process in Canada

AFMC Data Holdings - Learners Pathway to Practice

The AFMC Applicant Study provides information on applicants' age, sex, province/territory/foreign country of residence, citizenship status in Canada, previous educational institution, highest level of education, Medical College Admission Test (MCAT) results, number of schools applied to, whether they were new applicants or repeaters, whether they received any offers, and whether they subsequently registered. The study is primarily informed via the annual AFMC Applicant Survey that collects demographic and educational information about the applicants who apply to Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Applicant Study has been published as part of the CMES collection annually since 1978, with data from 2003 onward available in our database. This edition only includes MCAT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam.

Section F. The	AFMC Applicants Study – Table Contents:

Section F. The AFMC Applicants Study – Table Notes:

- 1. Tables in Section F were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. In previous CMES publications, application totals from 2009 to 2014 were incomplete due to missing data from the Ontario faculties of medicine. These values have since been added.

- 3. For further analysis of Population Aged 20 to 24, please see Table: 17-10-0005-01 (formerly CANSIM 051-0001) at: https://doi.org/10.25318/1710000501-eng
- 4. Some applicants who receive offer(s) of admission do not subsequently enter a Canadian faculty of medicine. Also, some applicants receive more than one offer of admission.
- 5. Applicant age is calculated based on their reported date of birth as of the reference date, December 31, 2024.
- 6. Language of instruction refers to the language used by the Faculty of Medicine, not the applicant's first language.
- 7. This edition only includes MCAT score information from the 2015 MCAT test. The scoring system ranks an applicant's score from 118 to 132 for four sub-tests constituting of: Biological and Biochemical Foundation of Living Systems, Chemical and Physical Foundations of Biological Systems, Psychological, Social and Biological Foundations of Behaviour, and Critical Analysis and Reasoning Skills (MCAT CARS). This gives a total score ranging from 472 to 528.

¹ "Number Admitted" refers to students who were accepted and registered, excluding those granted deferred admission.

² The index equals 100 when male and female success rates are the same. An index above 100 indicates greater success for females, while an index below 100 indicates greater success for males.

Canadian Medical Education Statistics 2024

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Program) Study - Description:

Enrolment into and Postgraduate medical Learners considering Graduation from attendance at a residents and fellows medical school Canadian MD programs Canadian MD program practising in Canada Undergraduate Students MD Graduates Postgraduate Training **Aspirants Applicants Electives** Residency Match Applicants and Elective rotations during Postgraduate training submitted applications (Residency) matching process in Canada clerkship phase of Canadian MD programs to MD programs in Canada

AFMC Data Holdings - Learners Pathway to Practice

The AFMC Undergraduate Medical Enrolment Study provides information on the sex, province/territory/foreign country of residence, year of study, registration status (i.e. new student, promoted from previous year, repeating same year of study, on leave of absence), campus, and position type. The study is primarily informed by the annual AFMC Enrolment Survey that collects demographic and educational information about the students registered in Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. Enrolment Survey data has been published in the CMES collection annually since 1978 with data from 2003 onward available in our database.

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Programs) Study – Table Notes:

- 1. Tables in Section G were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
- 2. At *Université de Montréal*, students enrolled in the first year of the five-year année préparatoire pre-medical program were phased in and out of several medical faculties over the years. For all years and medical faculties in which such programs operated, they were systematically excluded from the enrolment series (in most cases).
- 3. For all medical faculties and years in which the MD was granted only upon completion of an internship year, the students in the internship year were excluded from the enrolment series.
- 4. **1968/69**: *Université Laval* changed from a four-year MD program to a five-year program. Laval admitted a complete class into both the four-year and five-year programs. University of Saskatchewan also introduced its five-year program. It admitted half its usual complement of students into the four-year and half into the new five-year program.
- 5. 1969/70: Université de Montréal introduced a five-year program. It admitted two first-year classes, one into the four-year and one into the five-year program. Université Laval and the University of Saskatchewan admitted only to the five-year programs; they both had two second-year classes, one second-year class three years from graduation and one second-year class four years from graduation. McMaster University and Memorial University of Newfoundland each admitted its first class of medical students.
- 6. **1970/71**: *Université Laval* changed back to a four-year medical program for all its medical students. The newly admitted students to the four-year program as well as those entering the second year of the five-year program (admitted the previous year) were four years from graduation. Also, the third-year class consisted of an amalgamation of those three years from graduation in the five-year program and two years from graduation in the four-year program. University of Calgary admitted its first class of medical students.

- 7. **1987/88 & 1988/89**: University of Saskatchewan changed from a five-year program to a four-year program and did not admit any students into first year. In 1988/89 students were admitted into the first year of a new four-year program.
- 8. **1992/93**: *Université de Montréal* changed from a five-year program to a four-year program and did not admit any students into first year. It did, however, admit students into a preparatory year (*année préparatoire*).
- 9. **1996**: A new category of foreign students commenced the MD program in Canada. These are students admitted under agreements with foreign governments or foreign educational institutions. These students pay close to full cost for their medical education.
- 10. **1997/98**: University of Western Ontario (UWO) failed to report complete data. For this reason, all numbers relating to UWO, and any subtotals and totals, are estimated.
- 11. **2005/06**: Northern Ontario School of Medicine admitted its first class of medical students into Year 1.
- 12. 2021/22 2024/25: Sherbrooke only submitted enrolment counts for first-year students.
- 13. **2023/24**:
 - a. The format of Table G-19 has been simplified for clarity. The reported data remains the same.
 - b. The "Year 5+" column in tables G-2 and G-13 has been removed due to inconsistent reporting. This column previously reflected students in longer joint programs (e.g., MD/PhD) who were not reported under the year of the MD portion of their program (i.e., Year 1 to Year 4). These students are now included under the year that aligns with the MD portion of their program in tables G-2 and G-13.
 - c. For Table G-2, students in longer joint programs without a reported MD year of study were included in overall totals but excluded from individual year counts.

Table G-1
Enrolment in Canadian Faculties of Medicine by Sex
1995/96 to 2024/25

Year	Male	Female	Total	% Female
1995/96	3,276	3,358	6,634	50.6

^{*} Students in joint or combined programs (e.g., MD-PhD, MD-OMFS) are reported under the year that aligns with the MD portion of their program. In years where this alignment is not specified, they are included in the overall total above but not assigned to a specific year.

Note: Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2024/25, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

[†] In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering either *année préparatoire* or Year 1 of the MD program. Students promoted from *année préparatoire* into Year 1 are excluded.

- First-time enrolment excludes McGill University's Med-P program, repeaters, returnees from leaves of absence, and transfers from one faculty of medicine in Canada to another.
- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2024/25, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

[‡] "Advanced Standing" refers to students admitted directly into Year 2 or higher of the MD program.

2023/24	235	3,084	15	3,334	8,257	65	23	88	147	11,826
2024/25	256	3,272	104	3,632	8,532	50	34	84	109	12,357

¹ A small number of students admitted with advanced standing each year are transfers from one Canadian faculty of medicine to another (at most 2 per year).

- In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering Year 1 of the MD program. Students promoted from année préparatoire into Year 1 are excluded.
- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2024/25, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

² The option to prolong study is now available to students in some faculties of medicine. For this reason, the "repeaters" category has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested a prolonged period of study.

- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2024/25, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.
- For Université de Montréal, the figures listed include students enrolled in année préparatoire .

								Total	3,632

^{*} Includes students enrolled in année préparatoire at Université de Montréal.

Note: In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering either année préparatoire or Year 1 of the MD program. Students promoted from année préparatoire into Year 1 are excluded. These figures also exclude students in McGill University's Med-P program, repeaters, returnees from leaves of absence, and transfers from one faculty of medicine in Canada to another.

Expected Graduation Year	0
Sex	399
Total	12,357

¹ Students listed as five years plus to graduation include those enrolled in année préparatoire at Université de Montréal, as well as any students that choose to extend their MD program over five years.

⁻ Students at Université Laval have the option to complete their MD program over five years instead of four. Those reported as being five years from graduation include an estimate of Year 1 students who plan to extend their program. Those reported as four years from graduation include Year 1 students intending to complete the program in four years, as well as Year 2 students who plan to take an additional year. Those reported as three years from graduation include Year 2 students on the four-year track and Year 3 students who intend to extend their program.

⁻ Université de Sherbrooke reported only first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

¹ The option to prolong study is now available to students in some faculties of medicine. As a result, the "repeaters" category has been split to distinguish between students required by the faculty of medicine to repeat a year and those who have voluntarily extended their period of study.

- In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering Year 1 of the MD program. Students promoted from année préparatoire into Year 1 are excluded.
- Sherbrooke only reported first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school. Those reported under continuing students belong to the latter.

Table G-19

Enrolment Status of Students in Canadian Faculties of Medicine by Year of Study
2024/25

	Année préparatoire	Year 1	Year 2	Year 3	Year 4
Enrolled 1st time in this faculty of medicine	256	3,272	94	7	3
Continuing/promoted from année préparatoire	0	250	3,121	2,774	2,387

Attrition rates are calculated as follows:

Note: Université de Sherbrooke reported only first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school. Those reported under intermediate years belong to the latter.

¹⁾ All students enrolled during the 2023/24 academic year and who had definitely dropped out by September 2024 are included, irrespective of reason for drop-out.

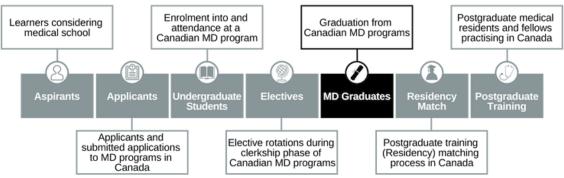

²⁾ Students who were on leaves of absence during the 2023/24 academic year and who were expected to return to medical studies during the 2023/24 academic year are included if they did not enrol in 2024/25 and the Faculty of Medicine confirmed that they would not be returning at a later date. Students whose leaves of absence were extended, for whatever reason, are not counted as dropouts

³⁾ Students who were expected to graduate in 2024 and who were later reported on the "List of Graduating Students, 2024" as drop-outs are included in these counts.

Canadian Medical Education Statistics 2024

Section H. The AFMC Graduates Study (MD Programs) – Description:

AFMC Data Holdings - Learners Pathway to Practice

This section provides data on MD degrees awarded by Canadian universities, with breakdowns by sex, age at graduation, language of instruction, legal status in Canada at time of entry to medical studies, and awarding university. The study is informed by the annual AFMC Survey of MD Graduates that collects demographic and educational information about the students who received the Doctor of Medicine (MD) degree at one of the seventeen Canadian Faculties of Medicine. This study has been published as part of the CMES collection annually since 1978 with data from 2003 onward available in our database.

Section H. Th	e AFMC Graduates Study (MD Programs) – Table Contents:

Graph 2-3	MD Degrees Awarded by Canadian Universities by Age and Sex (2024 calendar year)
Graph 4-5	MD Degrees Awarded by Canadian Universities by Age and Language of Instruction (2024 calendar year)

Section H. The AFMC Graduates Study (MD Programs) – Table Notes:

- 1. Tables in Section H were renumbered in Volume 40 for better readability. Please see APPENDIX D for references to the table numbers of the previous years' publications.
- 2. During 1983/84, the Data and Information Services of AFMC carried out a retrospective survey of the number of MDs awarded by Canadian universities since 1940. Each university was surveyed individually. The retrospective survey was conducted both to check on the accuracy of the data available at AFMC and to extend the series backwards in time. No reliable information was available on the number of MDs earned by women earlier than 1955 and the retrospective survey provided an opportunity to include information on the number of MDs earned by women each year since 1940. For seven of Canada's seventeen Faculties of Medicine, this historic series covers the entire period of their operation as MD awarding institutions. This corrected series, which has been as carefully checked as possible given the passage of time, replaces data on this topic published prior to the 1984 edition of CMES.
- 3. The MD was awarded for the first time in:
 - 1951 by University of Ottawa,
 - 1954 by University of British Columbia,
 - 1957 by University of Saskatchewan,
 - 1970 by Université de Sherbrooke,
 - 1972 by McMaster University,
 - 1973 by Memorial University of Newfoundland,
 - 1973 by University of Calgary, and
 - 2009 by NOSM University
 - * All other universities have awarded the MD during the entire period covered by this series.
- 4. Two classes graduated in the same year:

	,
- Dalhousie University	1943; 1974
- Université Laval	1946; 1949; 1965; 1972
- Université de Montréal	1965
- McGill University	1943
- University of Ottawa	1955
- Queen's University	1943
- University of Toronto	1943
- University of Western Ontario	1943; 1950
- University of Manitoba	1945; 1957
- University of Alberta	1943; 1948

Canadian Medical Education Statistics 2024

Section I. The Canadian Post-M.D. Education Registry, Canada's Definitive Source for Data on Post M.D. Training – Description:

The Canadian Post-M.D. Education Registry (CAPER) serves as the primary source for statistical data on postgraduate medical education in Canada. CAPER maintains detailed, individual-level information on all postgraduate medical residents and fellows. Since 1988, CAPER has been collecting annual post-M.D. training data from all 17 Canadian Faculties of Medicine. This data encompasses the entire span of postgraduate medical training and includes ongoing practice locations following the completion of training.

CAPER publishes statistical trends across more than 80 specialty and sub-specialty training fields, including family medicine, medical, surgical, and laboratory disciplines. By documenting residency and fellowship programs at all universities, CAPER offers a comprehensive, long-term view of the numbers and types of physicians progressing through Canada's post-M.D. training system.

In previous editions of CMES, we shared post-graduate data from the Canadian Post-M.D. Education Registry (CAPER). Starting with this edition, we will no longer publish this data. Instead, we encourage you to visit CAPER's website for comprehensive data on postgraduate training.

The following links will direct you to CAPER's key publications, which contain similar data to what was previously reported here:

- The <u>Annual Census of Post-M.D. Trainees</u> is CAPER's flagship report, offering a detailed statistical profile of post-M.D. trainees in Canada. Statistical series are present for:
 - o Faculty of Medicine Providing Post-M.D. Training
 - Field of Post-M.D. Training
 - o Trainee Gender, Age, Legal Status and Place of M.D. Graduation
 - Source of Funding for Post-M.D. Training
 - First Year Trainees

- o Estimated Practice Entry Cohort
- The <u>Census Data Tables</u> are an essential resource for understanding the distribution and characteristics of post-M.D. trainees, tracking changes over time, and identifying trends in medical education. Explore the CAPER Census Data Tables to gain a deeper understanding of the current state and evolution of postgraduate medical education in Canada.
- CAPER's <u>Provincial and Faculty Reports</u> supplement the Annual Census of Post-M.D. Trainees report, providing a more in-depth look at post-M.D. training across jurisdictions.
- The <u>Individual Specialty Reports</u> from CAPER provide detailed statistical snapshots for more than 60 specialties, including Family Medicine, Medical, Surgical, and Laboratory disciplines.
 These reports supplement the Annual Census of Post-M.D. Trainees by offering a closer look at specific fields of training.
- The <u>Report of the IMG Database</u> offers additional insights into the training and distribution of international medical graduates in Canada.

CAPER produces a variety of other data products. If you cannot find the specific data you need, CAPER invites you to submit a data request using their online <u>form</u>.

NOTES FOR APPENDIX A

AFMC Classification of Academic Disciplines

Several AFMC reports are dependent on reference tables for normalizing the scientific specialties reported by faculties of medicine into predetermined broad categories (e.g. basic sciences, clinical sciences and their subcategories anatomy and cell sciences, general surgery, etc.).

A recent review of the AFMC references tables and reports revealed an increasing number of reported disciplines or specializations being categorized under catch-all terms (i.e. miscellaneous, other...). At the same time, counts for catch-all categories have been increasing in size over the last several years. Not only are catch-all categories uninformative to AFMC's audiences, but they also prevent us from recognizing emerging trends in medical education and research.

In an effort to review how we categorize academic specialties, AFMC conducted a scan of classification schemes available in the public domain. In doing so, alternative classification schemes were described, and their characteristics were assessed. This evaluation was particularly attentive to academic specialties previously reported in AFMC surveys describing graduate student field of studies, faculty departments, and funded biomedical/health care research revenues by member faculties.

Starting with the release of data for reference year 2016/17, the Canadian Medical Education Statistics publication was revised in order to reflect the new classification of disciplines.

APPENDIX B

Definition of "Full-Time Faculty" by Canadian Faculty of Medicine

Each faculty of medicine has its own definition of "full-time". Listed below are the definitions as provided to AFMC on the AFMC Annual Faculty of Medicine Survey (AFMS).

Memorial University of Newfoundland: Faculty members holding the rank of Assistant Professor, Associate Professor, or

Professor, working full time hours.

Dalhousie University:

Full-time faculty are those faculty members with a 1.00 FTE and are:

- a member of the Dalhousie Faculty Association (DFA); or
- part of a clinical department academic funding plan (AFP); or
- a non-AFP member of a clinical department at a major teaching site.

Notes: Part-time faculty are those members with an FTE less than 1.0 and includes limited term post-retirement and adjunct appointments. Total tenure-stream number is a headcount, including only those with primary appointments in the Faculty of Medicine.

Université Laval:

Full-time faculty are salaried employees of Laval University who have the title of professor (full), associate professor, assistant professor, or other educators (lecturers in medicine and practical training officers).

Since the 2013-2014 report, we have brought some changes to the definitions of "part-time". We have included all the people who have not been counted as "full-time", but who have an official status at the Faculty of Medicine of Laval University (clinical instructors, clinical professors, and associate professors).

In respect of dividing them into "paid" and "volunteers", we have taken into account recent agreements between the government and the federations of physicians (FMOQ and FMSQ), which provide compensation for supervising clerks and residents as well as for some teaching activities in clinical settings. So, people in the "part-time" category are now considered as "paid", save for some exceptions. These exceptions appearing in the "volunteer" column refer to people who have received no pay from the faculty and who belong to the kinesiology and rehabilitation departments. Associate professors of all departments that have not been compensated by the faculty have been counted as "volunteers".

Université de Sherbrooke: Full-time faculty devote 100% of their time to engage in teaching, research, and clinical

responsibilities.

Université de Montréal:

A faculty member is considered full-time if 75% of their time is allocated to instruction, research, administration, or any scholarship of professional activity related to medical

education.

McGill University:

All full-time PhD staff and geographic full-time (university and hospital) appointees.

University of Ottawa:

REGULAR FACULTY MEMBER: a member of the academic staff, holding a regular appointment, who is in the bargaining unit as prescribed by the Association of Professors of the University of Ottawa Collective Agreement (APUO).

FULL-TIME ACADEMIC: as defined in the Faculty Appointments Advisory Committee manual: Category (Full-time/Part-time). Each of the categories of academic appointment will be differentiated by the amount of time dedicated to academic work on average over the course of the year.

Full-time: The physician or clinical scientist (PhD) spends four (4) full days or greater per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa.

continued

University of Ottawa (cont'd):

Part-time: The physician or clinical scientist (PhD) spends between one (1) and four (4) days per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa. The number of days per week shall be agreed to in the Letter of Agreement (LOA).

Queen's University:

Those who are appointed with appropriate academic rank whose responsibilities include education/teaching, research/scholarship, and administration. The responsibilities of full-time clinical faculty also include the provision of clinical service within their discipline.

University of Toronto:

Full-time Faculty:

- Includes all full-time clinical (MD) faculty appointed under the Clinical Faculty Policy and all full-time tenured/tenure-stream, teaching stream and contractually limited term appointments.
- Full-time clinical (MD) faculty are engaged in academic activities for at least 80% of their professional time. All other full-time faculty have a 100% FTE salaried appointment at the University of Toronto.

Total number of full-time faculty members who are tenured or within the tenure stream: The total includes continuing Faculty in the Tenure, Tenure-Stream, and Teaching-Stream. It does not include Non-Tenure Stream Faculty.

McMaster University:

Full-time faculty are those appointed under the McMaster University Revised Policy and Regulations with Respect to Academic Appointment, Tenure, and Promotion. Full-time faculty are those holding an academic appointment that is at least 0.75 FTE.

Western University:

Clinical Academic is a physician appointed by the University as a faculty member with responsibility for academic activities (i.e. clinical teaching; teaching; research; role model; health care leadership; general contributions and administration) in furtherance of the academic mission of the University. Clinical Academics may also be providers of care at the academic health science centre, community hospitals, and other health care related institutions, networks, practices, or teams.

Full-time Clinical Academic is a physician who:

- i) is appointed to a Limited Term or Continuing Appointment;
- ii) is generally located in an academic health sciences centre, community hospital, Family Medical Centre, or other clinical teaching unit or institution, with which the University has an affiliation agreement;
- iii) has an ARC in which the physician spends 50% or more of his or her time in an academic role with the University;
- contributes to the academic mission of the University with an on-going continuing commitment;
- v) may be remunerated for academic contributions through a department reward system;
- vi) and normally participates in a departmental Practice Plan, as required.

NOSM University:

The NOSM University School of Medicine has three Divisions: Clinical, Medical, and Human Sciences. It has predominantly part-time faculty in the Division of Clinical Sciences. Faculty members in the other Divisions are considered full-time if they have no appointments at other institutions and if at least 50% of their salary is paid by NOSM.

continued

University of Manitoba:

As per the University of Manitoba-University of Manitoba Faculty Association 2021-2024 Collective Agreement (Available online:

https://umanitoba.ca/careers/sites/careers/files/2025-07/umfa-collective-agreement-2024-2028-signed.pdf), a full-time faculty member is defined as an academic staff member with the rank of Professor, Associate Professor, Assistant Professor, or Lecturer who is appointed for a normal work load (i.e.: 1.0 FTE or 40 hours per week) for a minimum of twelve (12) calendar months.

University of Saskatchewan: The College of Medicine, University of Saskatchewan (CoM) has revised its definitions of faculty in accordance with governance and leadership restructuring in the College. We no longer use the designations "full-time" and "part-time" for our MD clinical faculty, except for those who are employees of the University. As an intentional component of our restructuring, the College no longer offers employment to clinicians but continues to recruit medical faculty to engage academically as self-employed contractors. As of mid-2016, only 30 clinicians remained employed by the University, while the much larger self-employed cohort is made up of clinicians for whom the designations "full-time" and "part-time" have no real relevance. Academic assignments and deliverables are discussed with all faculty on an annual basis, irrespective of their employed or selfemployed status.

> Our designation for "full-time faculty members" is reserved for those faculty who are employees of the university with an FTE of 1.0 only. The group includes most of the College's Senior Administration Leaders (Department Heads, Unified Department Heads, Associate Deans, Vice Deans, and the Dean), our biomedical scientists, our population health scientists, some clinicians, and some of our School of Rehabilitation Science faculty.

University of Alberta:

In compliance with the provisions of the Post-Secondary Learning Act and with consultation with the AASUA, the Board of Governors has formally designated the following groups of staff as academic staff for the purposes of the Post-Secondary Learning Act:

Academic staff that are in, or who may be granted, tenured or continuing appointments established under the Board and AASUA Collective Agreement and funded through operating funds, research operating funds or restricted funds. Academic staff are members of the AASUA.

University of Calgary:

Full-time faculty members are appointed as full-time regular members of the University's academic staff and receive a rank salary in accordance with the academic salary scales of the University.

University of British Columbia:

Full-time Faculty Members is defined as all persons appointed by the UBC Board of Governors on a full-time basis at the rank of Lecturer, Assistant Professor, Assistant Professor of Teaching, Associate Professor, Associate Professor of Teaching, Professor, Professor of Teaching or equivalent position.

APPENDIX D

CMES Table Cross-Reference

CMES 2018 Vol. 40 is the first version of the CMES publication to feature a new table naming system. New tables have been added, and all tables have been rearranged and organized into new and revised sections. This section will help guide you in finding the tables and graphs found in Vol. 46 and in older volumes of the CMES publication (up to 5 years).

			Table		
Table Name	CMES 2024 Vol. 46	CMES 2023 Vol. 45	CMES 2022 Vol. 44	CMES 2021 Vol. 43	CMES 2020 Vol. 42
Accredited Canadian Faculties of Medicine	A-1	A-1	A-1	A-1	A-1
Information about Canadian Faculties of Medicine	A-2i	A-2i	A-2i	A-2i	A-2i
Geographic Allocation of Places within Quota in Canadian Faculties of Medicine	A-2ii	A-2ii	A-2ii	A-2ii	A-2ii
Tuition Fees in Canadian Faculties of Medicine: Session Commencing Fall	A-3	A-3	A-3	A-3	A-3
Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine by Province of Residence	A-4	A-4	A-4	A-4	A-4
Payment Scales for Post-MD Clinical Trainees in Canadian Faculties of Medicine by Rank and Province of Training	A-5	A-5	A-5	A-5	A-5
Post-MD Clinical Trainee Fees in Canadian Faculties of Medicine	A-6	A-6	A-6	A-6	A-6
Duration of Clinical Clerkship and Amount of Stipend in Canadian Faculties of Medicine	A-7	A-7	A-7	A-7	A-7
Full-Time Faculty Members in Canadian Faculties of Medicine by Rank and Gender	B-1	B-1	B-1	B-1	B-1
Full-Time Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences and Health Sciences in Canadian Faculties of Medicine by Rank and Gender	B-2	B-2	B-2	B-2	B-2
Faculty Members in Each Canadian Faculty of Medicine by Rank and Gender — Full-Time	B-3i	B-3i	B-3i	B-3i	B-3i
Faculty Members in Each Canadian Faculty of Medicine by Rank and Gender — Part-Time	B-3ii	B-3ii	B-3ii	B-3ii	B-3ii
Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Discipline	B-4	B-4	B-4	B-4	B-4
Enrolment in Graduate Studies and Postdoctoral Studies and Degrees Awarded by Discipline in Canadian Faculties of Medicine	C-1	C-1	C-1	C-1	C-1

			Table		
Table Name	CMES 2024 Vol. 46	CMES 2023 Vol. 45	CMES 2022 Vol. 44	CMES 2021 Vol. 43	CMES 2020 Vol. 42
Enrolment in Graduate Studies and Postdoctoral Studies in Canadian Faculties of Medicine by Discipline	C-2	C-2	C-2	C-2	C-2
Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Masters	C-3	C-3	C-3	C-3	C-3
Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD	C-4	C-4	C-4	C-4	C-4
Degrees in Medical Sciences Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Masters	C-5	C-5	C-5	C-5	C-5
Degrees in Medical Sciences Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD	C-6	C-6	C-6	C-6	C-6
Biomedical Research Revenues: Funding and Affiliation of Canadian Faculties of Medicine	D-1	D-1	D-1	D-1	D-1
Biomedical Research Revenues of Canadian Faculties of Medicine by Source of Funds — Amounts	D-2	D-2	D-2	D-2	D-2
Biomedical Research Revenues of Canadian Faculties of Medicine by Source of Funds — Amounts	N/A	N/A	N/A	N/A	N/A
Biomedical Research Revenues of Canadian Faculties of Medicine by Category of Funds – Amounts	D-3	D-3	D-3	D-3	D-3
Biomedical Research Revenues of Canadian Faculties of Medicine by Category of Funds – Amounts	N/A	N/A	N/A	N/A	N/A
Biomedical Research Revenues of Canadian Faculties of Medicine by Top 50 Funding Sources	D-4	D-4	D-4	D-4	D-4
Biomedical Research Revenues of Canadian Faculties of Medicine by Top 50 Funding Sources	N/A	N/A	N/A	N/A	N/A
Distribution of Biomedical Research Revenues of Canadian Faculties of Medicine by Region	D-5	D-5	D-5	D-5	D-5
Biomedical Research Revenues of Canadian Faculties of Medicine by Discipline – Amounts	D-6	D-6	D-6	D-6	D-6
Biomedical Research Revenues of Canadian Faculties of Medicine by Discipline – Amounts	N/A	N/A	N/A	N/A	N/A
Biomedical and Health Care Research Revenues of Canadian Faculties of Medicine by Discipline — % Distribution	N/A	N/A	N/A	N/A	N/A

			Table		
Table Name	CMES 2024 Vol. 46	CMES 2023 Vol. 45	CMES 2022 Vol. 44	CMES 2021 Vol. 43	CMES 2020 Vol. 42
Applicants Seeking Admission to a Canadian Faculty of Medicine by Sex Compared with Population Aged 20 to 24 Years	F-1	F-1	F-1	F-1	F-1
Trends in Number of Applicants to Canadian Faculties of Medicine by Citizenship and Sex of Applicants	F-2i	F-2i	F-2i	F-2i	F-2i
Index Numbers: Trends in Number of Applicants to Canadian Faculties of Medicine by Citizenship and Sex of Applicants	F-2ii	F-2ii	F-2ii	F-2ii	F-2ii
Applicants to Canadian Faculties of Medicine by Legal Status, Number of Applications Filed and Average Number of Applications per Applicant	F-3	F-3	F-3	F-3	F-3
Applicants to Canadian Faculties of Medicine by Number of Applications Filed	F-4	F-4	F-4	F-4	F-4
Applicants to Canadian Faculties of Medicine by Residence	F-5	F-5	F-5	F-5	F-5
Number of Applications Received by Each Canadian Faculty of Medicine	F-6	F-6	F-6	F-6	F-6
Trends in Ages of All Applicants to Canadian Faculties of Medicine	F-7i	F-7i	F-7i	F-7i	F-7i
Trends in Ages of Male Applicants to Canadian Faculties of Medicine	F-7ii	F-7ii	F-7ii	F-7ii	F-7ii
Trends in Ages of Female Applicants to Canadian Faculties of Medicine	F-7iii	F-7iii	F-7iii	F-7iii	F-7iii
Percent Distribution in Ages of All Applicants to Canadian Faculties of Medicine by Sex	F-8i	F-8i	F-8i	F-8i	F-8i
Percent Distribution in Ages of Applicants (Male) to Canadian Faculties of Medicine by Sex	F-8ii	F-8ii	F-8ii	F-8ii	F-8ii
Percent Distribution in Ages of Applicants (Female) to Canadian Faculties of Medicine by Sex	F-8iii	F-8iii	F-8iii	F-8iii	F-8iii
Number of Applicants to Canadian Faculties of Medicine Who Received at Least One Offer of Admission by the Number of Offers Received	F-9	F-9	F-9	F-9	F-9
Number of Applications Received, Number of Offers Made and Places Filled at Canadian Faculties of Medicine by Faculty of Medicine	F-10	F-10	F-10	F-10	F-10
Relative Opportunities for the Study of Medicine in Canada	F-11	F-11	F-11	F-11	F-11

			Table		
Table Name	CMES 2024 Vol. 46	CMES 2023 Vol. 45	CMES 2022 Vol. 44	CMES 2021 Vol. 43	CMES 2020 Vol. 42
Admission Rates by Sex and Legal Status of Applicants to Canadian Faculties of Medicine	F-12	F-12	F-12	F-12	F-12
Admission Rates by Legal Status in Canada and Sex	F-13	F-13	F-13	F-13	F-13
Admission Rates by Province or Country of Residence of Applicants and Sex	F-14	F-14	F-14	F-14	F-14
Applicants to Canadian Faculties of Medicine and Success Rates by Sex and Language of Instruction of Schools to which Application was Made	F-15	F-15	F-15	F-15	F-15
Number of Applications Received by Each Canadian Faculty of Medicine by Sex of Applicants and Proportion of Applicants Admitted to Each Faculty of Medicine by Sex	F-16	F-16	F-16	F-16	F-16
Applicants to Canadian Faculties of Medicine by Number of Applications Filed and Legal Status in Canada	F-17	F-17	F-17	F-17	F-17
Average Number of Applications Filed by Legal Status in Canada and Sex	F-18i	F-18i	F-18i	F-18i	F-18i
Average Number of Applications Filed by Canadian Citizens by Language of Instruction of School(s) Applied To	F-18ii	F-18ii	F-18ii	F-18ii	F-18ii
Age Distribution of Applicants to Canadian Faculties of Medicine	F-19	F-19	F-19	F-19	F-19
Applicants to Canadian Faculties of Medicine by Sex and Whether or Not Registered	F-20	F-20	F-20	F-20	F-20
Percent Distribution of Age at Admission of Registered Applicants to Canadian Faculties of Medicine by Faculty of Medicine	F-21	F-21	F-21	F-21	F-21
Applicants to Canadian Faculties of Medicine by Province or Country of Residence, and Language of Instruction of School(s) Applied To	F-22i	F-22i	F-22i	F-22i	F-22i
Registrants to Canadian Faculties of Medicine by Province or Country of Residence, and Language of Instruction of School(s) Applied To	F-22ii	F-22ii	F-22ii	F-22ii	F-22ii
Applicants to Canadian Faculties of Medicine by Sex and Language of Instruction of School(s)	F-23	F-23	F-23	F-23	F-23
Applicants to Canadian Faculties of Medicine by Age, Sex and Language of Instruction of School(s) Applied To	F-24	F-24	F-24	F-24	F-24

			Table		
Table Name	CMES 2024 Vol. 46	CMES 2023 Vol. 45	CMES 2022 Vol. 44	CMES 2021 Vol. 43	CMES 2020 Vol. 42
Registered Applicants to Canadian Faculties of Medicine by Age and Language of Instruction of School(s) Applied To	F-25	F-25	F-25	F-25	F-25
Registered Applicants to Canadian Faculties of Medicine by Language of Instruction of School(s) Applied To, and Faculty of Registration	F-26	F-26	F-26	F-26	F-26
Percent Distribution of Educational Attainment at Time of Application of Registered and Not Registered Applicants to Canadian Faculties of Medicine	F-27	F-27	F-27	F-27	F-27
Distribution of MCAT Scores (2015 Edition) of Applicants to Canadian Faculties of Medicine	F-28	F-28	F-28	F-28	F-28i
Distribution of MCAT Scores (pre-2015) of Applicants to Canadian Faculties of Medicine	N/A	N/A	N/A	N/A	F-28ii
Distribution of MCAT Scores (2015 Edition) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex	F-29	F-29	F-29	F-29	F-29i
Distribution of MCAT Scores (pre-2015) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex	N/A	N/A	N/A	N/A	F-29ii
Distribution of MCAT Scores (2015 Edition) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex and Whether or Not Offered a Place — a. Biological and Biochemical Foundation of Living Systems	F-30i	F-30i	F-30i	F-30i	F-30i(a)
Distribution of MCAT Scores (2015 Edition) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex and Whether or Not Offered a Place — b. Chemical and Physical Foundations of Biological Systems	F-30ii	F-30ii	F-30ii	F-30ii	F-30i(b)
Distribution of MCAT Scores (2015 Edition) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex and Whether or Not Offered a Place — c. Psychological, Social and Biological Foundations of Behaviour	F-30iii	F-30iii	F-30iii	F-30iii	F-30i(c)
Distribution of MCAT Scores (2015 Edition) of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex and Whether or Not Offered a Place — d. Critical Analysis and Reasoning Skills (MCAT CARS)	F-30iv	F-30iv	F-30iv	F-30iv	F-30i(d)

			Table
