

Canadian Medical Education Statistics 2024

Section F. The AFMC Applicants Study – Description:

The AFMC Applicant Study provides information on applicants’ age, sex, province/territory/foreign country of residence, citizenship status in Canada, previous educational institution, highest level of education, Medical College Admission Test (MCAT) results, number of schools applied to, whether they were new applicants or repeaters, whether they received any offers, and whether they subsequently registered. The study is primarily informed via the annual AFMC Applicant Survey that collects demographic and educational information about the applicants who apply to Doctor of Medicine (MD) programs at the seventeen Canadian Faculties of Medicine. The Applicant Study has been published as part of the CMES collection annually since 1978, with data from 2003 onward available in our database. This edition only includes MCAT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam.

Section F. The AFMC Applicants Study – Table Notes:

1. Tables in Section F were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. In previous CMES publications, application totals from 2009 to 2014 were incomplete due to missing data from the Ontario faculties of medicine. These values have since been added.

3. For further analysis of Population Aged 20 to 24, please see Table: 17-10-0005-01 (formerly CANSIM 051-0001) at: <https://doi.org/10.25318/1710000501-eng>
4. Some applicants who receive offer(s) of admission do not subsequently enter a Canadian faculty of medicine. Also, some applicants receive more than one offer of admission.
5. Applicant age is calculated based on their reported date of birth as of the reference date, December 31, 2024.
6. Language of instruction refers to the language used by the Faculty of Medicine, not the applicant's first language.
7. This edition only includes MCAT score information from the 2015 MCAT test. The scoring system ranks an applicant's score from 118 to 132 for four sub-tests constituting of: Biological and Biochemical Foundation of Living Systems, Chemical and Physical Foundations of Biological Systems, Psychological, Social and Biological Foundations of Behaviour, and Critical Analysis and Reasoning Skills (MCAT CARS). This gives a total score ranging from 472 to 528.
