ACKNOWLEDGEMENTS

AFMC's Data and Information Services Team is pleased to present Volume 47 in its annual series of statistical publications related to medical education in Canada.

The assembly of the information contained in this publication involved many people and organizations who gave generously of their time and resources.

AFMC would like to thank the deans of Canada's faculties of medicine and those members of their staff who responded to the numerous questionnaires and requests for information.

Canadian Medical Education Statistics 2025

Background

Canadian Medical Education Statistics (CMES) is a collection of results from several annual studies conducted by AFMC's Data and Information Services team.

AFMC's Data and Information Services team manages the national repository of information on faculties of medicine across Canada. Formerly known as the Office of Research and Information Services (ORIS), this service was established in 1985 as a division of research and data collection at AFMC. With over 40 years of data holdings – primarily focused on undergraduate medical education – it provides expertise in data analysis and interpretation through longitudinal studies and trend analysis.

With this data, AFMC is the source of information on physician inflow and output through Canada's undergraduate and postgraduate training system, the number and types of doctors trained, and how they are distributed and move throughout Canada. AFMC also gathers data pertaining to our faculties of medicine such as their faculty complements, curriculum offerings, tuition fees, and research revenues.

The information published by AFMC in the Canadian Medical Education Statistics collection is based on data gathered through surveys of medical schools and learners. This data is used by the Canadian faculties of medicine, the federal government, provincial/territorial ministries of health, and private industries, as well as AFMC's constituents.

The Canadian Medical Education Statistics collection is organized into two parts, one focusing on the Faculties of Medicine themselves, and the second on the Pathway to Practice – that is, learners moving through the Medical Education system to become practicing providers. Data holdings for these two parts are summarized graphically below.

Canadian Medical Education Statistics 2025

AFMC Data Holdings - *Faculties of Medicine of Canada*

AFMC Data Holdings - *Learners Pathway to Practice*

Part I - Information on Faculties

Canadian Medical Education Statistics 2025

AFMC Data Holdings - *Faculties of Medicine of Canada*

Canadian Medical Education Statistics 2025

Section A. AFMC Faculties of Medicine Data – Description:

Section A contains information about the eighteen Canadian Faculties of Medicine. This section provides information on quotas for first-year positions, duration of clinical clerkships and stipend amounts, tuition and other fees, post-M.D. trainee fees and remuneration, and other information about the Faculties of Medicine. This data is collected primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual two-part survey collecting statistical information about Canadian faculties of medicine on a number of topics. AFMS data has been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section A. The AFMC Faculties of Medicine Data – Table Contents:	
Table A-1	Accredited Canadian Faculties of Medicine
Table A-2i	Information About Canadian Faculties of Medicine
Table A-2ii	Quota Allocation in Canadian Faculties of Medicine
Table A-3	Tuition Fees and Other Fees in Canadian Faculties of Medicine: Session Commencing Fall 2025
Table A-4	Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine by Province of Residence
Table A-5	Payment Scales for Post-MD Clinical Trainees in Canadian Faculties of Medicine by Rank and Province of Training
Table A-6	Post-MD Clinical Trainee Fees in Canadian Faculties of Medicine
Table A-7	Duration of Clinical Clerkship and Amount of Stipend in Canadian Faculties of Medicine

Section A. The AFMC Faculties of Medicine Data — Table Notes:

1. Tables in Section A were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Table A-7 contains information on the duration of clinical clerkship and the amount of stipend given to each Canadian Faculty of Medicine. Monthly payments are not always disbursed over the full duration of clerkship, per stipend. The faculties of medicine may offer additional clerkship opportunities such as integrated clerkships which differ in clerkship lengths and educational requirements.

	University of Calgary	160	Not available	3 years	English	Yes
British Columbia	University of British Columbia	328	Not available	4 years	English	Yes

¹ Regular quota numbers include positions for foreign students, as well as specific quota positions.

² Above Quota refers to positions outside regular quotas, including additional seats for Canadian learners (e.g., those funded by federal or provincial programs, or designated for Indigenous, rural, or Francophone minority communities) and for foreign learners admitted under contracts with foreign governments or institutions on a cost-recovery basis.

³ See Table A-2ii for details.

⁴ Université de Montréal's MD program is four years, or five years for students who first enrol in the one-year preparatory program (*année préparatoire*).

These figures are valid for 2025/26. They are subject to change in subsequent years.

* No quota reported in this category

¹ Up to 12 positions available to eligible First Nations and Inuit / Indigenous applicants who are residents of Quebec; these positions are distributed among the four Quebec faculties of medicine. Up to 4 positions available to eligible francophone students, funded by the Canadian Armed Forces pathway (Programme militaire d'études en médecine - PMEM); these positions are distributed among the four Quebec faculties of medicine that offer medical training in French: McGill University (Campus Outaouais only), Université de Sherbrooke, Université de Montréal and Université Laval.

² Other Above Quota refers to additional positions for Canadian learners (such as those funded by NWT, positions for rural students, and positions designated through the *Consortium national de formation en santé* for students from Francophone minority communities outside Quebec) as well as positions for foreign learners admitted under cost-recovery agreements with foreign governments or institutions.

Information available as of September 2025

¹ Exemption from paying the foreign differential fee may be granted in some cases. These exemptions are defined by individual provincial government policies.

² Other compulsory fees may vary for visa students, for example, comprehensive health care insurance.

Note: Unless otherwise noted, fees are for in-province residents; some schools charge a small surcharge for out-of-province learners.

Table A-4
Population Aged 20 to 24 and Number of First-Year Places Filled in Canadian Faculties of Medicine
by Province of Residence
2025/26

Province or Territory of Residence	Population Aged 20 to 24 July 1, 2025	First Time, First-Year Enrolment in 2025/26 ¹	Population Aged 20 to 24 per Place	Relative Opportunity ²	Rank
Newfoundland & Labrador	30,426	84	362	2.18	1
Prince Edward Island	14,339	24	597	1.32	4
Nova Scotia	67,646	133	509	1.55	2

Saskatchewan	83,773	107	783	1.01	7
Alberta	324,827	397	818	0.96	8
British Columbia	369,418	322	1,147	0.69	10
Yukon / NWT / Nunavut	9,728	3	3,243	0.24	11
Total, Residents of Canada	2,703,780	3,429	789	1.00	

Data shown refers to the province of residence of admitted students, irrespective of the province of location of the medical faculty in which students are studying.

¹ Excludes repeaters

² "Relative opportunity" compares the population per place for each province with that of the national average. A number greater than 1.00 illustrates a greater than average opportunity; a number less than 1.00 shows a lower than average opportunity.

Note: At Université de Montréal, first-time, first-year enrolment includes only students newly entering Year 1, excluding those promoted from *année préparatoire*.

Information available as of September 2025

N/A = not applicable

Notes:

Mandatory = rotations in specific disciplines which must be completed by each student.

Electives = optional programs which are the choice of students provided the choices are approved.

Selectives = optional programs that may be chosen from a particular set of courses.

Non-clinical = the components vary from one faculty to another; examples are: CaRMS interviews, orientation, examination review, ACLS (Advanced Cardiac Life Support).

Canadian Medical Education Statistics 2025

Section B. The AFMC Faculty Members Study — Description:

AFMC Data Holdings - *Faculties of Medicine of Canada*

The Faculty Members Study provides information on full-time and part-time faculty members by sex, rank and discipline. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS-Part II), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. AFMS data has been published annually in the CMES collection since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section B. The AFMC Faculty Members Study – Table Contents:	
Table B-1	Full-Time Faculty Members in Canadian Faculties of Medicine by Rank and Sex
Table B-2	Full-Time Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Sex
Table B-3i	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Full-Time
Table B-3ii	Faculty Members in Each Canadian Faculty of Medicine by Rank and Sex — Part-Time
Table B-4	Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences in Canadian Faculties of Medicine by Rank and Discipline

Section B. The AFMC Faculty Members Study – Table Notes:

1. Tables in Section B were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. The tables in Section B now contain sex-specific data for full-time and part-time faculty members (excluding table B-4). This change has been applied to all report years after, and including, 2001/02; it is broken down by discipline (table B-2), and faculty of medicine (table B-3).
3. See Appendix A for Classification of Disciplines.
4. See Appendix B for definition of "Full-Time Faculty" for the 2024/25 report year.
5. **2023/24:**
 - a. University of British Columbia did not report a breakdown by Sex for full-time or part-time faculty members.
 - b. Memorial University of Newfoundland did not report a breakdown by Sex for part-time faculty members.
6. **2024/25:**
 - a. Dalhousie University no longer reports faculty members by rank. As a result, its faculty members are not included in the full-time and part-time counts. A "Rank Not Reported" category has been added to the relevant tables to present these faculty members.
 - b. Memorial University of Newfoundland did not report a breakdown by Sex for part-time faculty members.

Notes:

- CMES 2019 (VOL 41) added two years of data on Full-Time Faculty Members: 2017/18, as well as 2018/19.

- From 2024/25 onwards, Dalhousie University no longer reports faculty members by rank. Because full-time and part-time status are derived from rank categories, these faculty members cannot be classified under either category and are instead reported under "Rank Not Reported".

Table B-2
Full-Time Faculty Members in Basic Medical and Biological Sciences, Clinical Sciences, and Health Sciences
in Canadian Faculties of Medicine by Rank and Sex
2010/11 - 2024/25

Notes:

- CMES 2019 (VOL 41) added two years of data on Full-Time Faculty Members: 2017/18, as well as 2018/19.
- From 2024/25 onwards, Dalhousie University no longer reports faculty members by rank. Because full-time and part-time status are derived from rank categories, these faculty members cannot be classified under either category and are instead reported under "Rank Not Reported".
- 2024/25: A total of 19 faculty member records were reported without a discipline classification, including 1 full-time faculty member and 18 faculty members whose ranks were not reported.

NR: not reported

Notes:

- From 2024/25 onwards, Dalhousie University no longer reports faculty members by rank. Because full-time and part-time status are derived from rank categories, these faculty members cannot be classified under either category and are instead reported under "Rank Not Reported".
- For 2024/25, Memorial University of Newfoundland did not report a breakdown by sex for part-time faculty members.

Canadian Medical Education Statistics 2025

Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study — Description:

AFMC Data Holdings - *Faculties of Medicine of Canada*

The Graduate Medical Education (GME) Study provides information on graduate students at the Masters and PhD level in the Faculties of Medicine including degrees awarded by discipline, years of study, and enrolment. The study is informed primarily via the AFMC Faculty of Medicine Survey (AFMS), which is an annual survey collecting statistical information about Canadian faculties of medicine on a number of topics. The GME study has been published in the CMES collection annually since 1978, with graduate student and faculty data available in our database since 2001 and all data since 2012.

Section C. The AFMC Graduate Medical Education - Masters and Doctoral (PhD) Candidates Study — Table Contents:

Table C-1	Enrolment in Graduate Studies and Postdoctoral Studies and Degrees Awarded by Discipline in Canadian Faculties of Medicine
Table C-2	Enrolment in Graduate Studies and Postdoctoral Studies in Canadian Faculties of Medicine by Discipline
Table C-3	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Masters
Table C-4	Enrolment in Graduate Studies in Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD
Table C-5	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Masters
Table C-6	Degrees in Graduate Studies Awarded by Canadian Faculties of Medicine by Faculty and Discipline — Doctorates/PhD

Section C. The AFMC Graduate Medical Education — Masters and Doctoral (PhD) Candidates Study –
Table notes:

1. Tables in Section C were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Enrolments include part-time students.
3. The classification of disciplines is reviewed on an ongoing basis, and, as a result, subtotals reported in previous years may differ slightly from subtotals in the current year.
4. See APPENDIX A for Classification of Disciplines.
5. Beginning in 2023/24, University of Manitoba did not report data on post-doctoral enrolments or on degrees awarded at the Master's (MSc) and Doctoral (PhD) levels.

	2024/25	11,521	7,393	1,873	4,378	1,088

Notes:

- 2024/25: The University of Ottawa and McMaster University did not classify their post-doctoral fellows by discipline, and the University of Toronto and Université de Sherbrooke reported a small number of post-doctoral fellows without a discipline classification. These post-doctoral fellows are included in the Total above but are not reflected in the individual counts for the Basic Medical and Biological Sciences, Clinical Sciences, or Health Sciences categories.

- Beginning in 2023/24, University of Manitoba did not report data on post-doctoral fellows enrolled or on MSc and PhD degrees awarded.

Canadian Medical Education Statistics 2025

Section D. The AFMC Biomedical Research Revenue Study – Description:

AFMC Data Holdings - *Faculties of Medicine of Canada*

The Biomedical Research Revenue Study (formerly Biomedical and Health Care Research Revenues Study) provides detailed information on investments in biomedical and health care research at the Canadian Faculties of Medicine that conduct research. Data informing the study are primarily collected via the annual Biomedical Research Revenues Survey that collects information on funding sources, amounts, and fields of research. Biomedical research revenues data have been collected since 1977; however, the survey was conducted only in paper format until 2004, and currently the AFMC Research Revenues database includes data from 2010 onwards. The survey was revised for the 1980/81 CMES publication to improve reporting on sources of funds and disciplines, and again in 2012/13 to standardize disciplines. The Biomedical Research Revenues Survey was revised in 2016/17 to ensure consistency in reporting and to include related affiliate revenue to better measure the true impact of research efforts across the Faculties of Medicine. Caution should be exercised when comparing 16/17 and later data to pre-15/16 data.

Section D. The AFMC Biomedical Research Revenue Study – Table Contents:

Table D-1	Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine
Table D-2	Biomedical Research Revenue of Canadian Faculties of Medicine by Source of Funds — Funding
Table D-3	Biomedical Research Revenue of Canadian Faculties of Medicine by Category of Funds — Funding
Table D-4	Biomedical Research Revenue of Canadian Faculties of Medicine by Top 50 Funding Sources
Table D-5	Distribution of Biomedical Research Revenue of Canadian Faculties of Medicine by Region
Table D-6	Biomedical Research Revenue of Canadian Faculties of Medicine by Discipline — Amounts

Section D. The AFMC Biomedical Research Revenue Study – Table Notes:

1. Tables in Section D were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. Tables in Section D have been updated in 2016/17 and 2017/18. They now separately report amounts for entities that are consolidated and those that are not, based on the institution's audited financial statements.
3. Affiliated research income is now included (see table D-1). Affiliate income is included only if:
 - a. The non-consolidated entity is an affiliated institution, as established by an affiliation agreement with the reporting institution.
 - b. Academic staff from the reporting institution lead the sponsored research project and conduct the research at the non-consolidated affiliated institution.
 - c. The income for the sponsored research is reported in the financial statements of the non-consolidated affiliated institution.
 - d. The sponsored research would be reported in the sponsored research fund had the research been conducted at the reporting institution, rather than at the affiliated institution.
4. In cases where affiliate revenues are not available or are only partially available, faculties were asked to provide an estimate.

This change has been applied to all report years after, and including, 2016/17 and 2017/18.

Table D-1
Biomedical Research Revenue: Funding and Affiliation of Canadian Faculties of Medicine
2023/24

Faculty of Medicine	(\$000's) of Amount

Five faculties did not categorize a total of \$359,179.65 in revenue by discipline: Dalhousie University (\$106,676.64), McGill University (\$190,000), University of Manitoba (\$62,332.63), University of Ottawa (\$137.38), and Queen's University (\$33)

See APPENDIX A for Classification of Disciplines.

All figures are in current Canadian dollars, uncorrected for changes in purchasing power values.

Part II - Information on Learners

Canadian Medical Education Statistics 2025

AFMC Data Holdings - *Learners Pathway to Practice*

Canadian Medical Education Statistics 2025

Section E. The AFMC Aspirants Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

AFMC continues to look for ways to improve the quality, accessibility, and equity of medical education. Recognizing that aspirants – those interested in a medical career – don’t all become applicants (see the AFMC Applicant Study), AFMC will be studying aspirants, their motivations, and what led them to apply or not apply to medical school in Canada. Look to this space for studies and data on the aspirant pool.

Canadian Medical Education Statistics 2025

The AFMC Aspirants Study

The annual Aspirant Study will be available in a future CMES volume. The Aspirant Survey, in which this data will be collected, is still undergoing revision. For more information on these data please contact data@afmc.ca.

Canadian Medical Education Statistics 2025

Section F. The AFMC Applicants Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Applicant Study provides information on applicants’ age, sex, province/territory/foreign country of residence, citizenship status in Canada, previous educational institution, highest level of education, Medical College Admission Test (MCAT) results, number of schools applied to, whether they were new applicants or repeaters, whether they received any offers, and whether they subsequently registered. The study is primarily informed via the annual AFMC Applicant Survey that collects demographic and educational information about the applicants who apply to Doctor of Medicine (MD) programs at the eighteen Canadian Faculties of Medicine. The Applicant Study has been published as part of the CMES collection annually since 1978, with data from 2003 onward available in our database. This edition only includes MCAT score information from the 2015 MCAT test even if an applicant had applied with test scores from the old (1991) MCAT exam.

Section F. The AFMC Applicants Study – Table Contents:

Table F-1	Applicants Seeking Admission to a Canadian Faculty of Medicine by Sex Compared with Population Aged 20 to 24 Years
Table F-2i	Trends in Number of Applicants to Canadian Faculties of Medicine by Citizenship and Sex of Applicants
Table F-2ii	Index Numbers: Trends in Number of Applicants to Canadian Faculties of Medicine by Citizenship and Sex of Applicants
Table F-3	Applicants to Canadian Faculties of Medicine by Legal Status, Number of Applications Filed, and Average Number of Applications per Applicant
Table F-4	Applicants to Canadian Faculties of Medicine by Number of Applications Filed
Table F-5	Applicants to Canadian Faculties of Medicine by Residence
Table F-6	Number of Applications Received by Each Canadian Faculty of Medicine
Table F-7i	Trends in Ages of All Applicants to Canadian Faculties of Medicine

Table F-7i (continued)	Index Numbers: Trends in Ages of All Applicants to Canadian Faculties of Medicine
Table F-7ii	Trends in Ages of Male Applicants to Canadian Faculties of Medicine
Table F-7ii (continued)	Index Numbers: Trends in Ages of Male Applicants to Canadian Faculties of Medicine
Table F-7iii	Trends in Ages of Female Applicants to Canadian Faculties of Medicine
Table F-7iii (continued)	Index Numbers: Trends in Ages of Female Applicants to Canadian Faculties of Medicine
Table F-8i	Percent Distribution in Ages of All Applicants to Canadian Faculties of Medicine by Sex
Table F-8ii	Percent Distribution in Ages of Applicants (Male) to Canadian Faculties of Medicine by Sex
Table F-8iii	Percent Distribution in Ages of Applicants (Female) to Canadian Faculties of Medicine by Sex
Table F-9	Number of Applicants to Canadian Faculties of Medicine Who Received at Least One Offer of Admission by the Number of Offers Received
Table F-10	Number of Applications Received, Number of Offers Made and Places Filled at Canadian Faculties of Medicine by Faculty of Medicine
Table F-11	Relative Opportunities for the Study of Medicine in Canada
Table F-12	Admission Rates by Sex and Legal Status of Applicants to Canadian Faculties of Medicine
Table F-13	Admission Rates by Legal Status in Canada and Sex
Table F-14	Admission Rates by Province or Country of Residence of Applicants and Sex
Table F-15	Applicants to Canadian Faculties of Medicine and Success Rates by Sex and Language of Instruction of Schools to which Application was Made
Table F-16	Number of Applications Received by Each Canadian Faculty of Medicine by Sex of Applicants and Proportion of Applicants Admitted to Each Faculty of Medicine by Sex
Table F-17i	Applicants to Canadian Faculties of Medicine by Number of Applications Filed and Legal Status in Canada
Table F-17ii	Applicants to Canadian Faculties of Medicine by Number of Applications Filed and Legal Status in Canada — Men
Table F-17iii	Applicants to Canadian Faculties of Medicine by Number of Applications Filed and Legal Status in Canada — Women
Table F-18i	Average Number of Applications Filed by Legal Status in Canada and Sex
Table F-18ii	Average Number of Applications Filed by Canadian Citizens by Language of Instruction of School(s) Applied to
Table F-19	Age Distribution of Applicants to Canadian Faculties of Medicine
Table F-20	Applicants to Canadian Faculties of Medicine by Sex and Whether or Not Registered

Table F-21	Percent Distribution of Age at Admission of Registered Applicants to Canadian Faculties of Medicine by Faculty of Medicine
Table F-22i	Applicants to Canadian Faculties of Medicine by Province or Country of Residence, and Language of Instruction of School(s) Applied To
Table F-22ii	Registrants to Canadian Faculties of Medicine by Province or Country of Residence, and Language of Instruction of School(s) Applied To
Table F-23	Applicants to Canadian Faculties of Medicine by Sex and Language of Instruction of School(s)
Table F-24	Applicants to Canadian Faculties of Medicine by Age, Sex and Language of Instruction of School(s) Applied To
Table F-25	Registered Applicants to Canadian Faculties of Medicine by Age and Language of Instruction of School(s) Applied To
Table F-26	Registered Applicants to Canadian Faculties of Medicine by Language of Instruction of School(s) Applied To and Faculty of Registration
Table F-27	Percent Distribution of Educational Attainment at Time of Application of Registered and Not Registered Applicants to Canadian Faculties of Medicine
Table F-28	Distribution of MCAT Scores of Applicants to Canadian Faculties of Medicine
Table F-29	Distribution of MCAT Scores of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex
Table F-30	Distribution of MCAT Scores of Residents of Canada Who Applied to Canadian Faculties of Medicine by Sex and Whether or Not Offered a Place
	i) Biological and Biochemical Foundation of Living Systems
	ii) Chemical and Physical Foundations of Biological Systems
	iii) Psychological, Social and Biological Foundations of Behaviour
	iv) Critical Analysis and Reasoning Skills (MCAT CARS)
	v) MCAT Total Score
Table F-31	Proportion (%) of Applicants Residents in Canada Offered Admission in a Canadian Faculty of Medicine by Sex and MCAT Score
Table F-32	Average MCAT Scores of Applicants to Canadian Faculties of Medicine by Province or Country of Residence
Table F-33	Distribution of MCAT Scores of Applicants Registered in a Canadian Faculty of Medicine by Sex — Residents of Canada

Section F. The AFMC Applicants Study – Table Notes:

1. Tables in Section F were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. In previous CMES publications, application totals from 2009 to 2014 were incomplete due to missing data from the Ontario faculties of medicine. These values have since been added.

3. For further analysis of Population Aged 20 to 24, please see Table: 17-10-0005-01 (formerly CANSIM 051-0001) at: <https://doi.org/10.25318/1710000501-eng>
4. Some applicants who receive offer(s) of admission do not subsequently enter a Canadian faculty of medicine. Also, some applicants receive more than one offer of admission.
5. Applicant age is calculated based on their reported date of birth as of the reference date, December 31, 2025.
6. Language of instruction refers to the language used by the Faculty of Medicine, not the applicant's first language.
7. This edition only includes MCAT score information from the 2015 MCAT test. The scoring system ranks an applicant's score from 118 to 132 for four sub-tests constituting of: Biological and Biochemical Foundation of Living Systems, Chemical and Physical Foundations of Biological Systems, Psychological, Social and Biological Foundations of Behaviour, and Critical Analysis and Reasoning Skills (MCAT CARS). This gives a total score ranging from 472 to 528.

NR: not reported

¹ "Number Admitted" refers to students who were accepted and registered, excluding those granted deferred admission.² The index equals 100 when male and female success rates are the same. An index above 100 indicates greater success for females, while an index below 100 indicates greater success for males.

Canadian Medical Education Statistics 2025

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Program) Study – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

The AFMC Undergraduate Medical Enrolment Study provides information on the sex, province/territory/foreign country of residence, year of study, registration status (i.e. new student, promoted from previous year, repeating same year of study, on leave of absence), campus, and position type. The study is primarily informed by the annual AFMC Enrolment Survey that collects demographic and educational information about the students registered in Doctor of Medicine (MD) programs at the eighteen Canadian Faculties of Medicine. Enrolment Survey data has been published in the CMES collection annually since 1978 with data from 2003 onward available in our database.

Table G-20	First-Time Enrolment Status of Students in Canadian Faculties of Medicine by Faculty of Medicine, Year of Study and Legal Status in Canada
Table G-21	Attrition (by September 2025) of Students Enrolled in Canadian Faculties of Medicine in 2024/25 by Faculty of Medicine and Year of Study

Section G. The AFMC Undergraduate Medical Education Enrolment (MD Programs) Study – Table Notes:

1. Tables in Section G were renumbered in Volume 40 for better readability. Please see Appendix D for references to the table numbers of the previous years' publications.
2. At *Université de Montréal*, students enrolled in the first year of the five-year *année préparatoire* pre-medical program were phased in and out of several medical faculties over the years. For all years and medical faculties in which such programs operated, they were systematically excluded from the enrolment series (in most cases).
3. For all medical faculties and years in which the MD was granted only upon completion of an internship year, the students in the internship year were excluded from the enrolment series.
4. **1968/69:** *Université Laval* changed from a four-year MD program to a five-year program. Laval admitted a complete class into both the four-year and five-year programs. University of Saskatchewan also introduced its five-year program. It admitted half its usual complement of students into the four-year and half into the new five-year program.
5. **1969/70:** *Université de Montréal* introduced a five-year program. It admitted two first-year classes, one into the four-year and one into the five-year program. *Université Laval* and the University of Saskatchewan admitted only to the five-year programs; they both had two second-year classes, one second-year class three years from graduation and one second-year class four years from graduation. McMaster University and Memorial University of Newfoundland each admitted its first class of medical students.
6. **1970/71:** *Université Laval* changed back to a four-year medical program for all its medical students. The newly admitted students to the four-year program as well as those entering the second year of the five-year program (admitted the previous year) were four years from graduation. Also, the third-year class consisted of an amalgamation of those three years from graduation in the five-year program and two years from graduation in the four-year program. University of Calgary admitted its first class of medical students.

7. **1987/88 & 1988/89:** University of Saskatchewan changed from a five-year program to a four-year program and did not admit any students into first year. In 1988/89 students were admitted into the first year of a new four-year program.
8. **1992/93:** *Université de Montréal* changed from a five-year program to a four-year program and did not admit any students into first year. It did, however, admit students into a preparatory year (*année préparatoire*).
9. **1996:** A new category of foreign students commenced the MD program in Canada. These are students admitted under agreements with foreign governments or foreign educational institutions. These students pay close to full cost for their medical education.
10. **1997/98:** University of Western Ontario (UWO) failed to report complete data. For this reason, all numbers relating to UWO, and any subtotals and totals, are estimated.
11. **2005/06:** Northern Ontario School of Medicine admitted its first class of medical students into Year 1.
12. **2021/22 – 2025/26:** Sherbrooke only submitted enrolment counts for first-year students.
13. **2023/24:**
 - a. The format of Table G-19 has been simplified for clarity. The reported data remains the same.
 - b. The “Year 5+” column in tables G-2 and G-13 has been removed due to inconsistent reporting. This column previously reflected students in longer joint programs (e.g., MD/PhD) who were not reported under the year of the MD portion of their program (i.e., Year 1 to Year 4). These students are now included under the year that aligns with the MD portion of their program in tables G-2 and G-13.
 - c. For Table G-2, students in longer joint programs without a reported MD year of study were included in overall totals but excluded from individual year counts.
14. **2025/26:** Toronto Metropolitan University School of Medicine admitted its first class of medical students into Year 1.

Table G-1
Enrolment in Canadian Faculties of Medicine by Sex
1996/97 to 2025/26

Year	Male	Female	Total	% Female
1996/97	3,189	3,262	6,451	50.6

* Students in joint or combined programs (e.g., MD-PhD, MD-OMFS) are reported under the year that aligns with the MD portion of their program. In years where this alignment is not specified, they are included in the overall total above but not assigned to a specific year.

Note: Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2025/26, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

Advanced Standing [‡] Canada	13	12	19	12	16	18	21	12	21	9
Advanced Standing [‡] Foreign	5	5	2	7	0	6	2	3	2	1

[†] In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering either *année préparatoire* or Year 1 of the MD program. Students promoted from *année préparatoire* into Year 1 are excluded.

[‡] "Advanced Standing" refers to students admitted directly into Year 2 or higher of the MD program.

Notes:

- First-time enrolment excludes McGill University's Med-P program, repeaters, returnees from leaves of absence, and transfers from one faculty of medicine in Canada to another.

- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2025/26, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

Correction: Newfoundland and Labrador totals for 2024/25 have been revised. Memorial University's Year 2 students (n = 81) were previously incorrectly reported under first-time enrolment and have been reclassified as continuing students.

¹ A small number of students admitted with advanced standing each year are transfers from one Canadian faculty of medicine to another (at most 2 per year).

² The option to prolong study is now available to students in some faculties of medicine. For this reason, the "repeaters" category has been split to distinguish those who are required by the faculty of medicine to repeat a year from those who have requested a prolonged period of study.

Notes:

- In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering Year 1 of the MD program. Students promoted from *année préparatoire* into Year 1 are excluded.

- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2025/26, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

Correction: 2024/25 totals have been revised. Memorial University's Year 2 students (n = 81) were previously incorrectly reported under first-time enrolment and have been reclassified as continuing students.

Notes:

- Université de Sherbrooke reported only first-year enrolment counts between 2021/22 and 2025/26, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.
- For Université de Montréal, the figures listed include students enrolled in *année préparatoire*.

Notes:

- Excludes McGill University's Med-P program, repeaters, returnees from leaves of absence and students who transferred from one Canadian faculty of medicine to another.

- In this table, the figures listed for Université de Montréal include:

	<u>2023/24</u>	<u>2024/25</u>	<u>2025/26</u>
• students promoted to year 1 from <i>année préparatoire</i> :	227	234	255
• students admitted directly into year 1:	119	147	142

Correction: 2024/25 totals have been revised. Memorial University's Year 2 students (n = 81) were previously incorrectly reported under first-time enrolment and have been reclassified as continuing students.

* Includes students enrolled in *année préparatoire* at Université de Montréal.

Note: In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering either *année préparatoire* or Year 1 of the MD program. Students promoted from *année préparatoire* into Year 1 are excluded. These figures also exclude students in McGill University's Med-P program, repeaters, returnees from leaves of absence, and transfers from one faculty of medicine in Canada to another.

Correction: 2024/25 totals have been revised. Memorial University's Year 2 students (n = 81) were previously incorrectly reported under first-time enrolment and have been reclassified as continuing students.

¹ Students listed as five years plus to graduation include those enrolled in *inannée préparatoire* at Université de Montréal, as well as any students that choose to extend their MD program over five years.

Notes:

- Students at Université Laval have the option to complete their MD program over five years instead of four. Those reported as being five years from graduation include an estimate of Year 1 students who plan to extend their program. Those reported as four years from graduation include Year 1 students intending to complete the program in four years, as well as Year 2 students who plan to take an additional year. Those reported as three years from graduation include Year 2 students on the four-year track and Year 3 students who intend to extend their program.

- Université de Sherbrooke reported only first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

Notes:

- Université de Sherbrooke reported only first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school.

- McMaster University and University of Calgary have 3-year MD programs. The third year is the final year. This table shows study year, not graduation year.

¹ The option to prolong study is now available to students in some faculties of medicine. As a result, the "repeaters" category has been split to distinguish between students required by the faculty of medicine to repeat a year and those who have voluntarily extended their period of study.

Notes:

- In this table, first-time Year 1 enrolment at Université de Montréal includes students newly entering Year 1 of the MD program. Students promoted from *année préparatoire* into Year 1 are excluded.

- Sherbrooke only reported first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school. Those reported under continuing students belong to the latter.

Table G-19
Enrolment Status of Students in Canadian Faculties of Medicine by Year of Study
2025/26

	<i>Année préparatoire</i>	Year 1	Year 2	Year 3	Year 4
Enrolled 1st time in this faculty of medicine	259	3,448	0	10	0
Continuing/promoted from année préparatoire	0	258	3,444	2,975	2,400
Repeaters/enrolled same year of study as 2024/25*	0	12	3	4	0
Readmitted after a leave of absence	1	21	20	58	22
Total	260	3,739	3,467	3,047	2,422

* Only students required by the faculty of medicine to repeat a year are included; students who voluntarily extended their period of study are excluded.

Note: Sherbrooke only reported first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school. Those reported under continuing students belong to the latter.

Attrition as % of enrolment	0	0	0	0.15	0.00	0.05	0.04	0.00	0.02	0.10	0.06	0.07	0.09	0.01	0.04

Attrition rates are calculated as follows:

- 1) All students enrolled during the 2024/25 academic year and who had definitely dropped out by September 2025 are included, irrespective of reason for drop-out.
- 2) Students who were on leaves of absence during the 2024/25 academic year and who were expected to return to medical studies during the 2024/25 academic year are included if they did not enrol in 2025/26 and the Faculty of Medicine confirmed that they would not be returning at a later date. Students whose leaves of absence were extended, for whatever reason, are not counted as drop-outs.
- 3) Students who were expected to graduate in 2025 and who were later reported on the "List of Graduating Students, 2025" as drop-outs are included in these counts.

Note: Université de Sherbrooke reported only first-year enrolment counts, along with a small number of students completing clerkship rotations who will receive their degrees from another Canadian medical school. Those reported under intermediate years belong to the latter.

Canadian Medical Education Statistics 2025

Section H. The AFMC Graduates Study (MD Programs) – Description:

AFMC Data Holdings - *Learners Pathway to Practice*

This section provides data on MD degrees awarded by Canadian universities, with breakdowns by sex, age at graduation, language of instruction, legal status in Canada at time of entry to medical studies, and awarding university. The study is informed by the annual AFMC Survey of MD Graduates that collects demographic and educational information about the students who received the Doctor of Medicine (MD) degree at one of the eighteen Canadian Faculties of Medicine. This study has been published as part of the CMES collection annually since 1978 with data from 2003 onward available in our database.

Section H. The AFMC Graduates Study (MD Programs) – Table Contents:

Table H-1	MD Degrees Awarded by Canadian Universities by Sex of Graduates
Table H-2	MD Degrees Awarded by Canadian Universities by Language of Instruction and Sex
Table H-3	MD Degrees Awarded by Canadian Universities by Legal Status in Canada at Time of Entry to Medical Studies
Table H-4i	MD Degrees Awarded by Canadian Universities 1996 to 2025 by University Awarding MD (calendar year totals)
Table H-4ii	MD Degrees Awarded by Canadian Universities 1996 to 2025 by University Awarding MD (calendar year totals) — Men
Table H-4iii	MD Degrees Awarded by Canadian Universities 1996 to 2025 by University Awarding MD (calendar year totals) — Women
Table H-5	Comparison of Number of MD Degrees Awarded by Canadian Universities by Sex of Recipient 1940 to 2025
Table H-6	MD Degrees Awarded by Canadian Universities by Age at Receipt of MD, Language of Instruction and Sex
Table H-7	MD Degrees Awarded by Canadian Universities by University Awarding Degree and Sex of Recipients
Table H-8	MD Degrees Awarded by Canadian Universities by University Awarding the Degree and Sex of Graduates

Graph 1	MD Degrees Awarded by Canadian Universities by Sex, 1940 to 2025 (5-year aggregates)
Graph 2-3	MD Degrees Awarded by Canadian Universities by Age and Sex (2025 calendar year)
Graph 4-5	MD Degrees Awarded by Canadian Universities by Age and Language of Instruction (2025 calendar year)

Section H. The AFMC Graduates Study (MD Programs) – Table Notes:

1. Tables in Section H were renumbered in Volume 40 for better readability. Please see APPENDIX D for references to the table numbers of the previous years' publications.
2. During 1983/84, the Data and Information Services of AFMC carried out a retrospective survey of the number of MDs awarded by Canadian universities since 1940. Each university was surveyed individually. The retrospective survey was conducted both to check on the accuracy of the data available at AFMC and to extend the series backwards in time. No reliable information was available on the number of MDs earned by women earlier than 1955 and the retrospective survey provided an opportunity to include information on the number of MDs earned by women each year since 1940. For seven faculties, this historic series covers the entire period of their operation as MD awarding institutions. This corrected series, which has been as carefully checked as possible given the passage of time, replaces data on this topic published prior to the 1984 edition of CMES.
3. The MD was awarded for the first time in:
 - 1951 by University of Ottawa,
 - 1954 by University of British Columbia,
 - 1957 by University of Saskatchewan,
 - 1970 by Université de Sherbrooke,
 - 1972 by McMaster University,
 - 1973 by Memorial University of Newfoundland,
 - 1973 by University of Calgary, and
 - 2009 by NOSM University

* All other universities have awarded the MD during the entire period covered by this series.
4. Two classes graduated in the same year:

- Dalhousie University	1943; 1974
- Université Laval	1946; 1949; 1965; 1972
- Université de Montréal	1965
- McGill University	1943
- University of Ottawa	1955
- Queen's University	1943
- University of Toronto	1943
- University of Western Ontario	1943; 1950
- University of Manitoba	1945; 1957
- University of Alberta	1943; 1948

Canadian Medical Education Statistics 2025

Section I. The Canadian Post-M.D. Education Registry, Canada's Definitive Source for Data on Post M.D. Training – Description:

The Canadian Post-M.D. Education Registry (CAPER) serves as the primary source for statistical data on postgraduate medical education in Canada. CAPER maintains detailed, individual-level information on all postgraduate medical residents and fellows. Since 1988, CAPER has been collecting annual post-M.D. training data from all Canadian Faculties of Medicine. This data encompasses the entire span of postgraduate medical training and includes ongoing practice locations following the completion of training.

CAPER publishes statistical trends across more than 80 specialty and sub-specialty training fields, including family medicine, medical, surgical, and laboratory disciplines. By documenting residency and fellowship programs at all universities, CAPER offers a comprehensive, long-term view of the numbers and types of physicians progressing through Canada's post-M.D. training system.

In previous editions of CMES, we shared post-graduate data from the Canadian Post-M.D. Education Registry (CAPER). Starting with this edition, we will no longer publish this data. Instead, we encourage you to visit CAPER's website for comprehensive data on postgraduate training.

The following links will direct you to CAPER's key publications, which contain similar data to what was previously reported here:

- The [Annual Census of Post-M.D. Trainees](#) is CAPER's flagship report, offering a detailed statistical profile of post-M.D. trainees in Canada. Statistical series are present for:
 - Faculty of Medicine Providing Post-M.D. Training
 - Field of Post-M.D. Training
 - Trainee Gender, Age, Legal Status and Place of M.D. Graduation
 - Source of Funding for Post-M.D. Training
 - First Year Trainees
 - Estimated Practice Entry Cohort

- The [Census Data Tables](#) are an essential resource for understanding the distribution and characteristics of post-M.D. trainees, tracking changes over time, and identifying trends in medical education. Explore the CAPER Census Data Tables to gain a deeper understanding of the current state and evolution of postgraduate medical education in Canada.
- CAPER's [Provincial and Faculty Reports](#) supplement the Annual Census of Post-M.D. Trainees report, providing a more in-depth look at post-M.D. training across jurisdictions.
- The [Individual Specialty Reports](#) from CAPER provide detailed statistical snapshots for more than 60 specialties, including Family Medicine, Medical, Surgical, and Laboratory disciplines. These reports supplement the Annual Census of Post-M.D. Trainees by offering a closer look at specific fields of training.
- The [Report of the IMG Database](#) offers additional insights into the training and distribution of international medical graduates in Canada.

CAPER produces a variety of other data products. If you cannot find the specific data you need, CAPER invites you to submit a data request using their online [form](#).

NOTES FOR APPENDIX A

AFMC Classification of Academic Disciplines

Several AFMC reports are dependent on reference tables for normalizing the scientific specialties reported by faculties of medicine into predetermined broad categories (e.g. basic sciences, clinical sciences and their subcategories anatomy and cell sciences, general surgery, etc.).

A recent review of the AFMC references tables and reports revealed an increasing number of reported disciplines or specializations being categorized under catch-all terms (i.e. miscellaneous, other...). At the same time, counts for catch-all categories have been increasing in size over the last several years. Not only are catch-all categories uninformative to AFMC's audiences, but they also prevent us from recognizing emerging trends in medical education and research.

In an effort to review how we categorize academic specialties, AFMC conducted a scan of classification schemes available in the public domain. In doing so, alternative classification schemes were described, and their characteristics were assessed. This evaluation was particularly attentive to academic specialties previously reported in AFMC surveys describing graduate student field of studies, faculty departments, and funded biomedical/health care research revenues by member faculties.

Starting with the release of data for reference year 2016/17, the Canadian Medical Education Statistics publication was revised in order to reflect the new classification of disciplines.

APPENDIX B

Definition of "Full-Time Faculty" by Canadian Faculty of Medicine

Each faculty of medicine has its own definition of "full-time". Listed below are the definitions as provided to AFMC on the AFMC Annual Faculty of Medicine Survey (AFMS).

Memorial University of Newfoundland:	Faculty members holding the rank of Assistant Professor, Associate Professor, or Professor, working full time hours.
Dalhousie University:	Full-time faculty are those faculty members with a 1.00 FTE and are: • a member of the Dalhousie Faculty Association (DFA); or • part of a clinical department academic funding plan (AFP); or • a non-AFP member of a clinical department at a major teaching site. Notes: Part-time faculty are those members with an FTE less than 1.0 and includes limited term post-retirement and adjunct appointments. Total tenure-stream number is a headcount, including only those with primary appointments in the Faculty of Medicine.
Université Laval:	Full-time faculty are salaried employees of Laval University who have the title of professor (full), associate professor, assistant professor, or other educators (lecturers in medicine and practical training officers). Since the 2013-2014 report, we have brought some changes to the definitions of "part-time". We have included all the people who have not been counted as "full-time", but who have an official status at the Faculty of Medicine of Laval University (clinical instructors, clinical professors, and associate professors). In respect of dividing them into "paid" and "volunteers", we have taken into account recent agreements between the government and the federations of physicians (FMOQ and FMSQ), which provide compensation for supervising clerks and residents as well as for some teaching activities in clinical settings. So, people in the "part-time" category are now considered as "paid", save for some exceptions. These exceptions appearing in the "volunteer" column refer to people who have received no pay from the faculty and who belong to the kinesiology and rehabilitation departments. Associate professors of all departments that have not been compensated by the faculty have been counted as "volunteers".
Université de Sherbrooke:	Full-time faculty are regular faculty members with exclusive appointments to the Faculty of Medicine and Health Sciences. Regular faculty are appointed in one of five categories: research professors, physician-professors, physician-researchers, teaching professors, and health sciences practitioner professors.
Université de Montréal:	A faculty member is considered full-time if 75% of their time is allocated to instruction, research, administration, or any scholarship of professional activity related to medical education.
McGill University:	All full-time PhD staff and geographic full-time (university and hospital) appointees.
University of Ottawa:	REGULAR FACULTY MEMBER: a member of the academic staff, holding a regular appointment, who is in the bargaining unit as prescribed by the Association of Professors of the University of Ottawa Collective Agreement (APUO). FULL-TIME ACADEMIC: as defined in the Faculty Appointments Advisory Committee manual: Category (Full-time/Part-time). Each of the categories of academic appointment will be differentiated by the amount of time dedicated to academic work on average over the course of the year. Full-time: The physician or clinical scientist (PhD) spends four (4) full days or greater per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa.

continued

APPENDIX B (continued)

University of Ottawa (cont'd):

Part-time: The physician or clinical scientist (PhD) spends between one (1) and four (4) days per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa. The number of days per week shall be agreed to in the Letter of Agreement (LOA).

Queen's University:

Those who are appointed with appropriate academic rank whose responsibilities include education/teaching, research/scholarship, and administration. The responsibilities of full-time clinical faculty also include the provision of clinical service within their discipline.

University of Toronto:

Full-time Faculty:

- Includes all full-time clinical (MD) faculty appointed under the Clinical Faculty Policy and all full-time tenured/tenure-stream, teaching stream and contractually limited term appointments.

- Full-time clinical (MD) faculty are engaged in academic activities for at least 80% of their professional time. All other full-time faculty have a 100% FTE salaried appointment at the University of Toronto.

Total number of full-time faculty members who are tenured or within the tenure stream: The total includes continuing Faculty in the Tenure, Tenure-Stream, and Teaching-Stream. It does not include Non-Tenure Stream Faculty.

McMaster University:

Full-time faculty are those appointed under the McMaster University Revised Policy and Regulations with Respect to Academic Appointment, Tenure, and Promotion. Full-time faculty are those holding an academic appointment that is at least 0.75 FTE.

Western University:

Clinical Academic is a physician appointed by the University as a faculty member with responsibility for academic activities (i.e. clinical teaching; teaching; research; role model; health care leadership; general contributions and administration) in furtherance of the academic mission of the University. Clinical Academics may also be providers of care at the academic health science centre, community hospitals, and other health care related institutions, networks, practices, or teams.

Full-time Clinical Academic is a physician who:

- i) is appointed to a Limited Term or Continuing Appointment;
- ii) is generally located in an academic health sciences centre, community hospital, Family Medical Centre, or other clinical teaching unit or institution, with which the University has an affiliation agreement;
- iii) has an ARC in which the physician spends 50% or more of his or her time in an academic role with the University;
- iv) contributes to the academic mission of the University with an on-going continuing commitment;
- v) may be remunerated for academic contributions through a department reward system;
- vi) and normally participates in a departmental Practice Plan, as required.

NOSM University:

Faculty: Individuals having an academic rank at NOSM University whose responsibilities include any or all of the following: teaching, research, administrative work, committee work, scholarly activity and hold a faculty rank of either Lecturer, Lecturer Interprofessional Education, Assistant Professor, Associate Professor, or Professor.

continued

APPENDIX B (continued)

University of Manitoba:	As per the University of Manitoba-University of Manitoba Faculty Association 2024-2028 Collective Agreement (Available online: https://umanitoba.ca/careers/sites/careers/files/2025-07/umfa-collective-agreement-2024-2028-signed.pdf), a full-time faculty member is defined as an academic staff member with the rank of Professor, Associate Professor, Assistant Professor or Lecturer who is appointed for a normal work load (i.e.: 1.0 FTE or 40 hours per week) for a minimum of twelve (12) calendar months.
University of Saskatchewan:	The College of Medicine, University of Saskatchewan (CoM) revised its definitions of faculty in accordance with governance and leadership restructuring in the College in 2016. We no longer use the designations “full-time” and “part-time” for our MD clinical faculty, except for those who are employees of the University. As an intentional component of our restructuring, the College no longer offers employment to clinicians but continues to recruit medical faculty to engage academically as self-employed contractors. As of mid-2016, only 30 clinicians remained employed by the University, while the much larger self-employed cohort is made up of clinicians for whom the designations “full-time” and “part-time” have no real relevance. Academic assignments and deliverables are discussed with all faculty on an annual basis, irrespective of their employed or self-employed status. Our designation for “full-time faculty members” is reserved for those faculty who are employees of the university (USFA Faculty) with an FTE of 1.0 only. The group includes most of the College's Senior Administration Leaders (Department Heads, Associate Deans, Vice-Deans and the Dean), our biomedical scientists, our population health scientists, some clinicians and all of our School of Rehabilitation Science faculty. The source reporting data for this group is the 2024-2025 (June 30, 2025) Human Resource Department records of the University. The source for the PAID numbers (reported as VOL in previous years) is our CoM's Medical Faculty database for active appointments in the 2024-2025 academic year (as of June 30, 2025).
University of Alberta:	In compliance with the provisions of the Post-Secondary Learning Act and with consultation with the AASUA, the Board of Governors has formally designated the following groups of staff as academic staff for the purposes of the Post-Secondary Learning Act: Academic staff that are in, or who may be granted, tenured or continuing appointments established under the Board and AASUA Collective Agreement and funded through operating funds, research operating funds or restricted funds. Academic staff are members of the AASUA.
University of Calgary:	Full-time faculty members are appointed as full-time regular members of the University's academic staff and receive a rank salary in accordance with the academic salary scales of the University.
University of British Columbia:	Full-time Faculty Members is defined as all persons appointed by the UBC Board of Governors on a full-time basis at the rank of Lecturer, Assistant Professor, Assistant Professor of Teaching, Associate Professor, Associate Professor of Teaching, Professor, Professor of Teaching or equivalent position.
