NOTES FOR APPENDIX A

AFMC Classification of Academic Disciplines

Several AFMC reports are dependent on reference tables for normalizing the scientific specialties reported by faculties of medicine into predetermined broad categories (e.g. basic sciences, clinical sciences and their subcategories anatomy and cell sciences, general surgery, etc.).

A recent review of the AFMC references tables and reports revealed an increasing number of reported disciplines or specializations being categorized under catch-all terms (i.e. miscellaneous, other...). At the same time, counts for catch-all categories have been increasing in size over the last several years. Not only are catch-all categories uninformative to AFMC's audiences, but they also prevent us from recognizing emerging trends in medical education and research.

In an effort to review how we categorize academic specialties, AFMC conducted a scan of classification schemes available in the public domain. In doing so, alternative classification schemes were described, and their characteristics were assessed. This evaluation was particularly attentive to academic specialties previously reported in AFMC surveys describing graduate student field of studies, faculty departments, and funded biomedical/health care research revenues by member faculties.

Starting with the release of data for reference year 2016/17, the Canadian Medical Education Statistics publication was revised in order to reflect the new classification of disciplines.

APPENDIX B

Definition of "Full-Time Faculty" by Canadian Faculty of Medicine

Each faculty of medicine has its own definition of "full-time". Listed below are the definitions as provided to AFMC on the AFMC Annual Faculty of Medicine Survey (AFMS).

Memorial University of Newfoundland:	Faculty members holding the rank of Assistant Professor, Associate Professor, or Professor, working full time hours.
Dalhousie University:	Full-time faculty are those faculty members with a 1.00 FTE and are: • a member of the Dalhousie Faculty Association (DFA); or • part of a clinical department academic funding plan (AFP); or • a non-AFP member of a clinical department at a major teaching site. Notes: Part-time faculty are those members with an FTE less than 1.0 and includes limited term post-retirement and adjunct appointments. Total tenure-stream number is a headcount, including only those with primary appointments in the Faculty of Medicine.
Université Laval:	Full-time faculty are salaried employees of Laval University who have the title of professor (full), associate professor, assistant professor, or other educators (lecturers in medicine and practical training officers). Since the 2013-2014 report, we have brought some changes to the definitions of "part-time". We have included all the people who have not been counted as "full-time", but who have an official status at the Faculty of Medicine of Laval University (clinical instructors, clinical professors, and associate professors). In respect of dividing them into "paid" and "volunteers", we have taken into account recent agreements between the government and the federations of physicians (FMOQ and FMSQ), which provide compensation for supervising clerks and residents as well as for some teaching activities in clinical settings. So, people in the "part-time" category are now considered as "paid", save for some exceptions. These exceptions appearing in the "volunteer" column refer to people who have received no pay from the faculty and who belong to the kinesiology and rehabilitation departments. Associate professors of all departments that have not been compensated by the faculty have been counted as "volunteers".
Université de Sherbrooke:	Full-time faculty are regular faculty members with exclusive appointments to the Faculty of Medicine and Health Sciences. Regular faculty are appointed in one of five categories: research professors, physician-professors, physician-researchers, teaching professors, and health sciences practitioner professors.
Université de Montréal:	A faculty member is considered full-time if 75% of their time is allocated to instruction, research, administration, or any scholarship of professional activity related to medical education.
McGill University:	All full-time PhD staff and geographic full-time (university and hospital) appointees.
University of Ottawa:	REGULAR FACULTY MEMBER: a member of the academic staff, holding a regular appointment, who is in the bargaining unit as prescribed by the Association of Professors of the University of Ottawa Collective Agreement (APUO). FULL-TIME ACADEMIC: as defined in the Faculty Appointments Advisory Committee manual: Category (Full-time/Part-time). Each of the categories of academic appointment will be differentiated by the amount of time dedicated to academic work on average over the course of the year. Full-time: The physician or clinical scientist (PhD) spends four (4) full days or greater per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa.

continued

APPENDIX B (continued)

University of Ottawa (cont'd):

Part-time: The physician or clinical scientist (PhD) spends between one (1) and four (4) days per week in academic activities as approved by the Department Chair and the Dean (and as defined by an academic job description), at the University, a research institute, or a fully affiliated hospital, community affiliated hospital or an affiliated community practice with a relationship with the University of Ottawa. The number of days per week shall be agreed to in the Letter of Agreement (LOA).

Queen's University:

Those who are appointed with appropriate academic rank whose responsibilities include education/teaching, research/scholarship, and administration. The responsibilities of full-time clinical faculty also include the provision of clinical service within their discipline.

University of Toronto:

Full-time Faculty:

- Includes all full-time clinical (MD) faculty appointed under the Clinical Faculty Policy and all full-time tenured/tenure-stream, teaching stream and contractually limited term appointments.

- Full-time clinical (MD) faculty are engaged in academic activities for at least 80% of their professional time. All other full-time faculty have a 100% FTE salaried appointment at the University of Toronto.

Total number of full-time faculty members who are tenured or within the tenure stream: The total includes continuing Faculty in the Tenure, Tenure-Stream, and Teaching-Stream. It does not include Non-Tenure Stream Faculty.

McMaster University:

Full-time faculty are those appointed under the McMaster University Revised Policy and Regulations with Respect to Academic Appointment, Tenure, and Promotion. Full-time faculty are those holding an academic appointment that is at least 0.75 FTE.

Western University:

Clinical Academic is a physician appointed by the University as a faculty member with responsibility for academic activities (i.e. clinical teaching; teaching; research; role model; health care leadership; general contributions and administration) in furtherance of the academic mission of the University. Clinical Academics may also be providers of care at the academic health science centre, community hospitals, and other health care related institutions, networks, practices, or teams.

Full-time Clinical Academic is a physician who:

- i) is appointed to a Limited Term or Continuing Appointment;
- ii) is generally located in an academic health sciences centre, community hospital, Family Medical Centre, or other clinical teaching unit or institution, with which the University has an affiliation agreement;
- iii) has an ARC in which the physician spends 50% or more of his or her time in an academic role with the University;
- iv) contributes to the academic mission of the University with an on-going continuing commitment;
- v) may be remunerated for academic contributions through a department reward system;
- vi) and normally participates in a departmental Practice Plan, as required.

NOSM University:

Faculty: Individuals having an academic rank at NOSM University whose responsibilities include any or all of the following: teaching, research, administrative work, committee work, scholarly activity and hold a faculty rank of either Lecturer, Lecturer Interprofessional Education, Assistant Professor, Associate Professor, or Professor.

continued

APPENDIX B (continued)

University of Manitoba:	As per the University of Manitoba-University of Manitoba Faculty Association 2024-2028 Collective Agreement (Available online: https://umanitoba.ca/careers/sites/careers/files/2025-07/umfa-collective-agreement-2024-2028-signed.pdf), a full-time faculty member is defined as an academic staff member with the rank of Professor, Associate Professor, Assistant Professor or Lecturer who is appointed for a normal work load (i.e.: 1.0 FTE or 40 hours per week) for a minimum of twelve (12) calendar months.
University of Saskatchewan:	The College of Medicine, University of Saskatchewan (CoM) revised its definitions of faculty in accordance with governance and leadership restructuring in the College in 2016. We no longer use the designations “full-time” and “part-time” for our MD clinical faculty, except for those who are employees of the University. As an intentional component of our restructuring, the College no longer offers employment to clinicians but continues to recruit medical faculty to engage academically as self-employed contractors. As of mid-2016, only 30 clinicians remained employed by the University, while the much larger self-employed cohort is made up of clinicians for whom the designations “full-time” and “part-time” have no real relevance. Academic assignments and deliverables are discussed with all faculty on an annual basis, irrespective of their employed or self-employed status. Our designation for “full-time faculty members” is reserved for those faculty who are employees of the university (USFA Faculty) with an FTE of 1.0 only. The group includes most of the College's Senior Administration Leaders (Department Heads, Associate Deans, Vice-Deans and the Dean), our biomedical scientists, our population health scientists, some clinicians and all of our School of Rehabilitation Science faculty. The source reporting data for this group is the 2024-2025 (June 30, 2025) Human Resource Department records of the University. The source for the PAID numbers (reported as VOL in previous years) is our CoM's Medical Faculty database for active appointments in the 2024-2025 academic year (as of June 30, 2025).
University of Alberta:	In compliance with the provisions of the Post-Secondary Learning Act and with consultation with the AASUA, the Board of Governors has formally designated the following groups of staff as academic staff for the purposes of the Post-Secondary Learning Act: Academic staff that are in, or who may be granted, tenured or continuing appointments established under the Board and AASUA Collective Agreement and funded through operating funds, research operating funds or restricted funds. Academic staff are members of the AASUA.
University of Calgary:	Full-time faculty members are appointed as full-time regular members of the University's academic staff and receive a rank salary in accordance with the academic salary scales of the University.
University of British Columbia:	Full-time Faculty Members is defined as all persons appointed by the UBC Board of Governors on a full-time basis at the rank of Lecturer, Assistant Professor, Assistant Professor of Teaching, Associate Professor, Associate Professor of Teaching, Professor, Professor of Teaching or equivalent position.
